#### 电商平台介绍 Introduction to E-commerce Platforms

#### 跨境电商 Cross-border E-commerce

物流方式介绍 Introduction to Logistics Methods

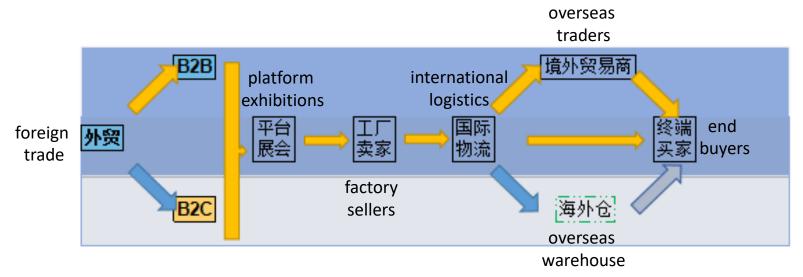

## 什么是跨境电商物流? What is cross-border e-commerce logistics?

what is closs-bolder e-commerce logistics:

#### 业务模式 Business Models

商户类型 Merchant Types

#### 一类, 贸易型, 快速增长, 供应链短板明显

I. Trade based, rapid growth with significant supply chain shortcomings

#### 二类, 工贸型, 专注产品, 厚积薄发, 供应链优势明显

II. Industry and trade type, product focused, with a strong supply chain advantage

三类,产品型,细分类目独角兽,不断优化供应链优势

III. Product-based, sub-category unicorns, constantly optimising supply chain advantages

#### **Cross-border E-commerce Logistics Chain**

FBA头程物流 FBA Headway Logistics

什么是FBA头程物流? What is FBA Headway Logistics? FBA=FULLFILLMENT BY AMAZON

覆盖哪些国家? Which countries does it cover?

为何在跨境电商物流中有代表性? Why is it representative in cross-border e-commerce logistics? 2021年,亚马逊先后推出了波兰站(3月2日)、埃及站(9月1日),至此,亚马逊的站点数量达到了20个。 包括美国、日本、德国、英国、印度、意大利、法国、加拿大、西班牙、巴西、墨西哥、澳大利亚、土耳 其、荷兰、阿联酋、沙特阿拉伯、瑞典、波兰、埃及、新加坡。 In 2021, Amazon has launched the Poland station (March 2) and Egypt station (September 1). So far, the number of Amazon sites has reached 20. Including USA, Japan, Germany, UK, India, Italy, France, Canada, Spain, Brazil, Mexico, Australia, Turkey, Netherlands, UAE, Saudi Arabia, Sweden, Poland, Egypt, Singapore.

其中有17个站点对中国卖家开放注册。Among them, 17 sites are open to registration for Chinese sellers.

(百万美元)	Net revenue	Online stores	Physical stores	Retail third-party seller services	Subscription services	AWS	Other
2019-Q4	87,437	45,657	4,363	17,446	5,235	9,954	4,782

)21年Q1-Q3	3324亿美元	1560亿美元	124亿美元	730亿美元	236亿美元	444亿美元	229亿美元

来源:亚马逊季度财报 市场: Amazon全球

亚马逊全球市场的总销售额连续5年保持增长,2021年 总销售额达到1277.9亿美元,增长超600亿美元,相比 2020年增长了22%。表明亚马逊市场规模仍在不断扩大。 The total sales of Amazon's global marketplace have maintained growth for five consecutive years. In 2021, total sales reached 127.79 billion US dollars, an increase of more than 60 billion US dollars, an increase of 22% compared with 2020. It shows that the size of the Amazon market is still expanding.

#### 亚马逊各季度全球净收入,来源于在线商店、线下商店、 第三方卖家服务、订阅服务、AWS及其他(广告等)收 入。

Amazon's quarterly global net revenue comes from online stores, offline stores, third-party seller services, subscription services, AWS, and other (advertising, etc.) revenue.

#### 海外仓 Overseas Warehouses

海外仓的建设可以让出口企业将货物批量发送至国外仓库,实现该 国本地销售,本地配送。 The construction of overseas warehouses allows export companies to send goods in batches to foreign warehouses to achieve local sales and local distribution in the country.

为何不使用本土仓库? Why not use local warehouses?

海外仓的未来发展趋势。 The future development trend of overseas warehouses.

#### 海外仓的核心竞争力 The Core Competitiveness of Overseas Warehouses

一件代发兼容打托中转,并支持多平 台amazon、wayfair、walmart、 overstock、lowes、homedepot

Direct from manufacturer shipping is compatible with transit, and supports multiple platforms

自有稳定的快递账号

Have stable courier account

布局、库容

Layout, storage capacity

Diversified services such as oversized items (over the size required by the courier)

Powerful IT processing capabilities to aid operational data extraction

#### 《国际物流产业数字化发展报告》-2021.5.26 Report on the Digital Development of the International Logistics Industry - May 26, 2021

国际物流产业数字化发展报告

#### 第2章国际物流数字化现状和热点

#### 2.1 数字科技赋能国际物流

近年来,数字科技的发展带动了国际物流产业数字化水平不断提升。船公司、港口企业、货运代理企业等纷纷 探索数字化转型,国际物流业务全程可视、在线交易、智慧经营等渐成趋势。在这样的背景下,国际物流产业催生 出便捷高效、绿色环保、智能柔性和安全可靠等需求。当前,整个国际物流产业外部环境、市场需求、业务模式等发 生了重大的变化,但若不能及时跟上这些变化,就会转变为发展瓶颈,例如,服务单一、运输成本高、信息交换效率 低、运输过程不透明、供应链上各角色的协同效率低等。而电子商务、物联网、云计算、大数据、区块链、5G、人工智 能等数字技术则为突破这些瓶颈提供了可能性,从而利用数字科技对国际物流业进行优化赋能。例如,运去哪运 用电子商务、大数据、人工智能、区块链等技术,实现在线订舱、无纸化单证、自动化订单操作、收发货人共享协作 等功能,并通过API接口连接港口、船公司、仓储、拖车行、报关行、货代、货主等行业上下游资源,打通数据孤岛,构 建端到端的全智能化跨境物流平台。所以,借助数字技术推动国际物流产业发展是当前的大势所趋。

Chapter 2 Current Situation and Hot Spots of International Logistics Digitalization

#### 2.1 Digital technology empowers international logistics

In recent years, the development of digital technology has led to the continuous improvement of the digital level of the international logistics industry. Shipping companies, port companies, and freight forwarders have been exploring digital transformation. The use of international logistics business visibility, online transactions, and smart management has gradually become a trend. In this context, the international logistics industry has given birth to the needs of convenience and efficiency, green environmental protection, intelligent flexibility, safety and reliability. At present, major changes have taken place in the external environment, market demand, and business model of the entire international logistics industry. However, if these changes cannot be kept up with, it will become a development bottleneck, such as single service, high transportation costs, and low information exchange efficiency. The transportation process is not transparent, and the coordination efficiency of various roles in the supply chain is low. And e-commerce, Internet of Things, cloud computing, big data, blockchain, 5G, artificial intelligence

Digital technologies such as energy provide the possibility to break through these bottlenecks, so as to use digital technology to optimize and empower the international logistics industry. For example, Yun Quna uses e-commerce, big data, artificial intelligence, blockchain and other technologies to realize functions such as online booking, paperless documents, automated order operations, consignee and consignee sharing and collaboration, and connect through API interfaces The upstream and downstream resources of ports, shipping companies, warehousing, trailer dealers, customs brokers, freight forwarders, cargo owners and other industries have opened up data silos and built an end-to-end fully intelligent cross-border logistics platform. Therefore, the use of digital technology to promote the development of the international logistics industry is the current general trend.

#### 数字科技 Digital Technology

#### 使决策灵活、高效、精细 Make decision-making flexible, efficient and refined

大数据收集和整理、预测,帮助国际物流企业做决策。Big data collectiNG, sorting and forecasting help international logistics companies make decisions. 风险防范和风险评估。Risk prevention and risk assessment.

#### 有效降低人力成本 Effectively reduce labor costs

智能化订单处理系统 Intelligent order processing system RPA机器人 RPA Robot

# 2

#### 优化方案、柔性服务 Optimized plan, flexible service

物联网结合云技术, 实时追踪, 全程物流透明化。 The Internet of Things combines cloud technology and real-time tracking to make the entire logistics process transparent.

#### 强化信息链,提升上下游协同能力 Strengthen the information chain and improve the upstream and downstream synergy capabilities

解决企业合作中信息不透明、互信程度低、自动化服 务程度低等问题,推进全球化链接。

Solve the problems of opaque information, low level of mutual trust, and low level of automated services in enterprise cooperation, and promote global links.
