

CAREC Road Safety and Sustainable Mobility Course

February 2024

Upcoming Initiatives in the CAREC region

Ritu Mishra, ADB

ROAD SAFETY STRATEGY AND KNOWLEDGE PRODUCTS

Trainings/Workshops conducted

Several national and regional trainings/workshops on topics:

- road safety data systems and research
- road safety engineering
- road safety education and awareness
- road safety enforcement
- pedestrian safety
- crash data investigation and analysis
- Road safety audit

Ongoing CAREC activities in 2024

- Review of crash data for CAREC countries and developing web-based dashboard for all CAREC countries
- A model developed for the interactions of road safety with the climate change
- Road safety capacity building for Mongolia:
 - i. Draft regulations for road safety audits and assessments
 - ii. establish a road safety engineering function
 - iii. Conduct capacity building in road safety principles, management and practice
 - iv. Train road engineers in road safety audit, iRAP assessment and network safety rating
- A report prepared on recommendations related to policies and legislative frameworks across CAREC, addressing vehicle insurance requirements, regulations, and overloading’.

Publications/ Knowledge events in the pipeline

Publications:

- Blackspot Investigation, Analysis and treatment
- Why and How to manage speed
- Review of crash data in the CAREC region
- Interactions of road safety with the climate change

Workshops/Trainings:

- National trainings relating to road safety engineering in Pakistan, Kazakasthan and Georgia
- Regional workshops relating to crash data review and analysis
- Regional workshop relating to safe systems approach

Plans for 2025 and beyond

- Projects and capacity building programs on speed management, vehicle safety standards
- Child road safety including schools
- Remote and urban road safety
- Occupational road safety including commercial vehicle safety
- Capacity building in road safety like RSE accreditation program, tertiary courses, etc.
- Financing mechanisms for road safety
- Implementation of national road safety action plans
- ITS and new technologies to enhance road safety
- Regional knowledge sharing sessions on lessons learnt and best practices
- Any thoughts/ideas are welcome

Thank you
