Commonly held policy goals can quickly meet unexpected headwind

Graduates in STEM 'need to rise by half'

The UK needs to boost its output of science, technology, engineering and maths graduates by almost 50 per cent to satisfy market demand, a thinktank has calculated.

Published on March 18, 2013

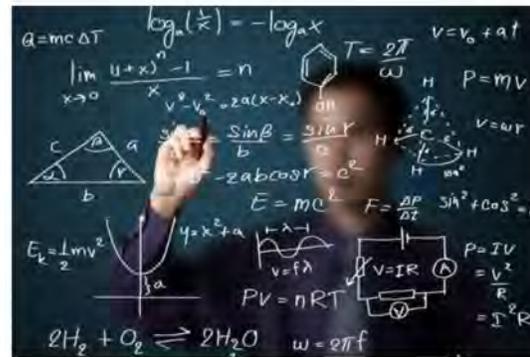

Last updated May 26, 2015

[Paul Jump](#)

Twitter: [@PaulJump](#)

The Social Market Foundation's report, *In the Balance: The STEM human capital crunch*, published today, calculates that an ageing workforce will see around 100,000 vacancies arise annually in jobs requiring degrees in STEM subjects.

It notes that the coalition government's crackdown on immigration and uncertainty over future membership of the European Union is likely to require these vacancies to be filled by domestically produced graduates.

2015

A screenshot of a CIO article titled "AI is taking over junior IT positions". The article is dated Sep 2, 2025, and is 3 minutes long. It is categorized under "Careers". The article text states: "Entry-level technology positions are among those most affected by the rise of artificial intelligence." Below the text is a photograph of a person sitting at a desk with a laptop, holding a smartphone. The person's hands are on the laptop keyboard. A coffee cup and a pair of glasses are also on the desk. The year "2025" is written in a yellow box in the bottom right corner of the image.

2025

Uncertainty requires expanding our planning toolkit

WIUT

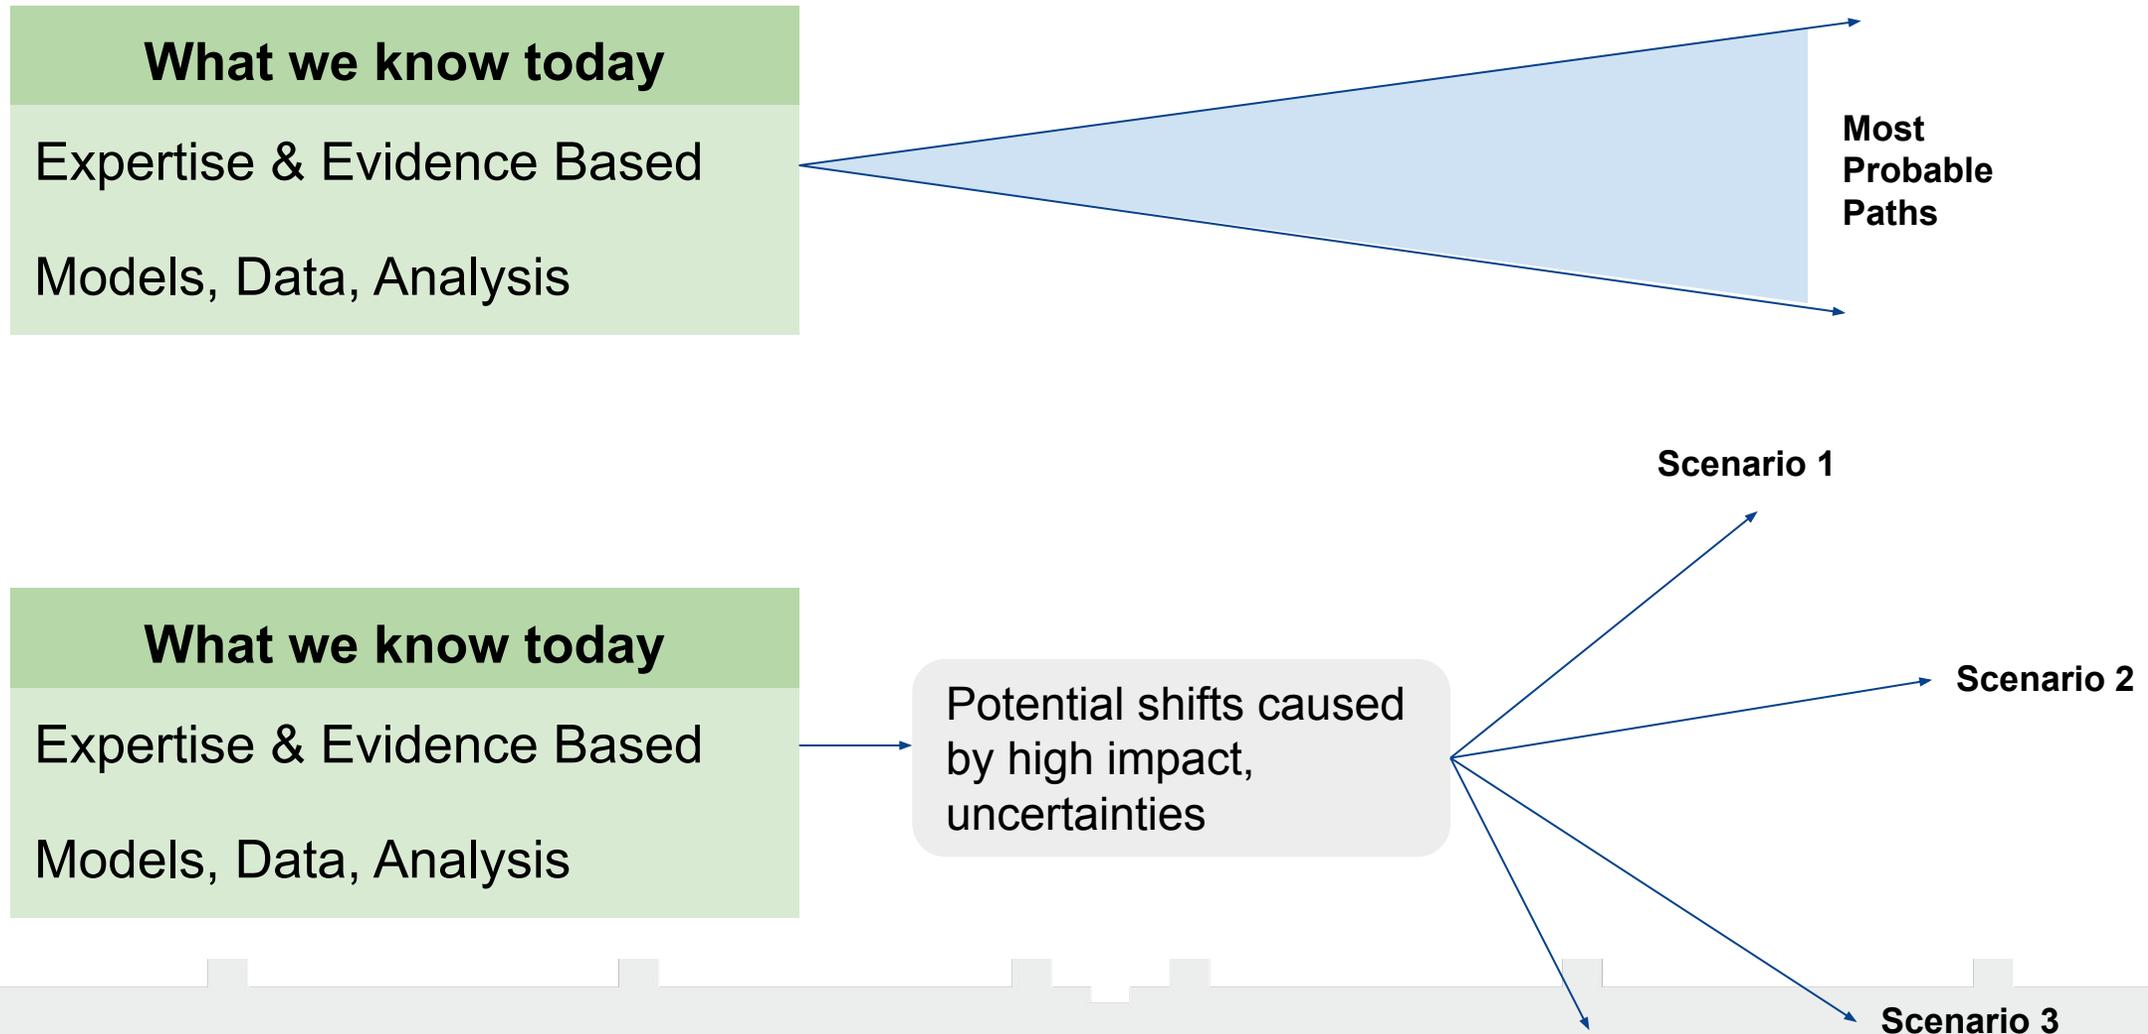

Jesper Brodin,
CEO of Ingka Group | IKEA

The risks, the uncertainty, everything that used to be in a 'risk matrix file' is more or less happening

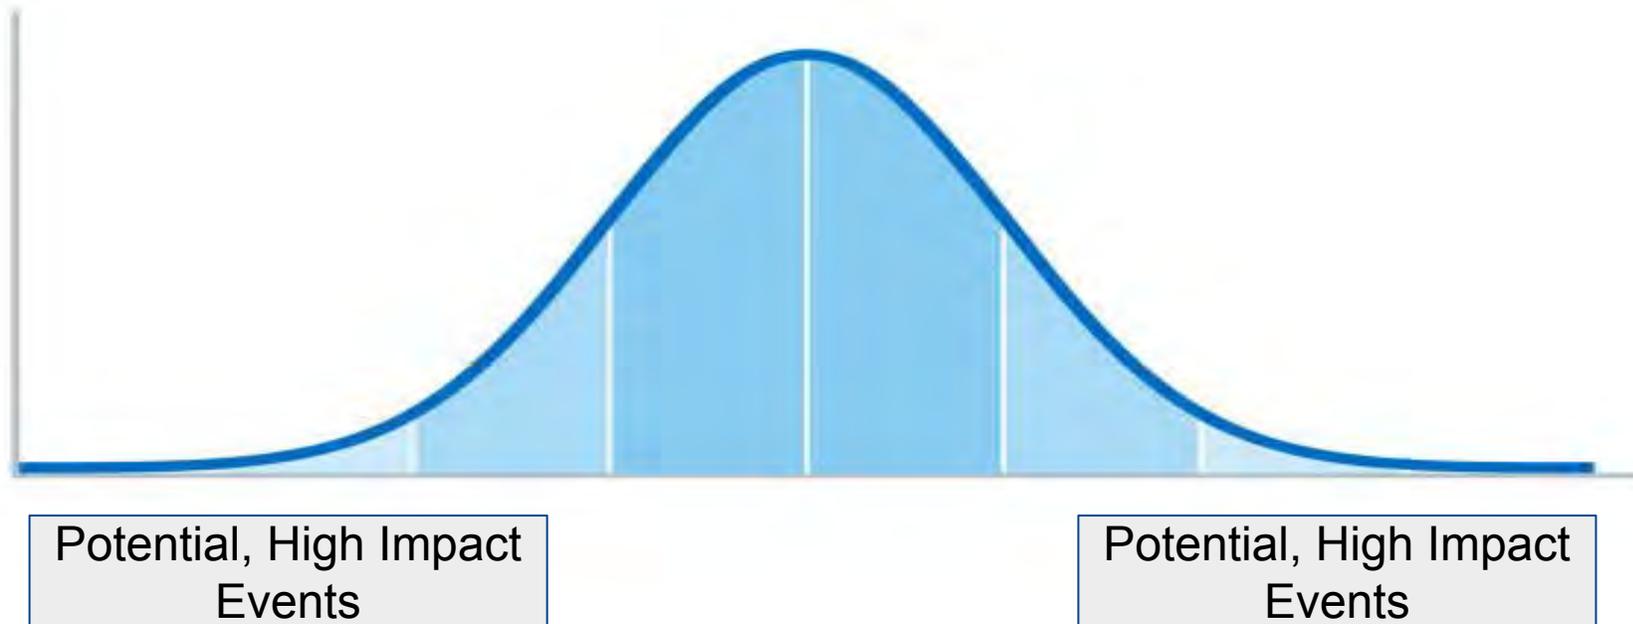

We laugh about the time when we were doing one-year budgets, and how we would be right or wrong by 0.3 per cent

[Foresight] is teaching us agility in how we operate

Planning in uncertain policy spaces needs to go beyond planning for the probable

Looking beyond the probable: Potentially high-impact implications

Anticipatory Innovation Governance as an approach for policy and governance in highly uncertain policy spaces

AIG uses uncertainty as a space for innovation (experimenting) with policy implementation within set visions and objectives

Anticipatory Innovation Governance is part of a larger movement of developing futures focused policymaking

Singapore:

Centre for Strategic Futures (Prime Ministers' Office)

Malaysia:

MyForesight (Ministry of Science)

Finland:

Committee of the Future (Parliament)

UAE:

Future Foresight Strategy (Ministry of Cabinet Affairs)

Wales:

Future Generations Commissioner for Wales (Gov't Commissioner)

Kenya:

Futures Senate Committee (being established)

Ukraine:

Strategic Foresight for Ukraine (Parliament)

Chile:

Ministry of Foreign Affairs

Anticipatory Innovation Governance is part of a larger movement of developing futures focused policymaking

WIUT

Singapore:

Centre for **Strategic Futures** (Prime Ministers' Office)

Malaysia:

My**Foresight** (Ministry of Science)

Finland:

Committee of the Future (Parliament)

UAE:

Future Foresight Strategy (Ministry of Cabinet Affairs)

Wales:

Future Generations Commissioner for Wales (Gov't Commissioner)

Kenya:

Futures Senate Committee (being established)

Ukraine:

Strategic Foresight for Ukraine (Parliament)

Chile:

Ministry of Foreign Affairs

Key Differences of Anticipatory Innovation Governance

Anticipatory:

- Explores multiple possible futures simultaneously
- Real-time monitoring and adaptation

Governance:

- Long-term vision with short-term experimentation
- Learning-oriented with continuous feedback loops

Innovation:

- Experimentation drives policy development
- Active testing of alternatives in real-world settings
- Portfolio approach - expects some failures

Key Differences of Anticipatory Innovation Governance

WIUT

Faster learning of changes, rather than reacting to them

Anticipate these changes

Work together to see the world differently

Support a more resilient, agile, innovative policy process

the University of Westminster (UK)

Anticipatory Innovation Governance: What does this look like

Innovation through Experimentation:

Financial Regulatory Sandboxes in Singapore

Singapore's Monetary Authority (MAS) established FinTech Innovation Lab in 2015, which partnered with the private sector, allowing:

- MAS to actively learn from cutting-edge emerging developments in the field, to which it previously did not have real-time access
- FinTech solutions to be tested within a limited customer base, following a limited timeframe and given lighter legal and regulatory requirements
- Promote Singapore's financial sector (a key development policy goal)

Anticipatory in Action: Rethinking the Digital Divide

WIUT

Source: Photo by Aleks Habarovs on Unsplash,
https://unsplash.com/photos/three-children-walk-along-a-dirt-path-0M5pRB_a5_l

As part of a 5-year plan for a Southeast Asian country and UNICEF in 2013, digital divide research was conducted.

Beyond a digital divide, **a single** teacher in rural Malaysia told me:

“Children were skipping school to earn money to buy smartphones and internet access”

Led to a joint Government-UNICEF Digital Youth Lab

Example of Experimentation:

China's Central control and local discretion for health insurance schemes in the 1990s

In early 2000s, 300 local governments given implementation choices for health interventions

- Local experimentation with central coordination
- Successfully identified and scaled up effective health interventions with "contextual fit"

Central government controls the overall policy agenda and direction of reform, sets implementation targets for local governments (frontline implementers of the national scheme), and has oversight

Sub-national governments act as problem solvers and change managers, rather than straightforward implementers of policy. Central government encourages and tolerates a wide range of policy practices.

Anticipatory Innovation Governance and Uzbekistan 2030

Learning and Engaging with AIG within the Uzbekistan 2030

WIUT

Anchored in Uzbekistan 2030, we will apply AIG concepts and tools to

- Explore shifts occurring in and out of Uzbekistan
- Implications, opportunities, challenges
- Potential Policy responses

Areas of Focus:

- AI and Digitalization
- Energy Development
- Economic Development
- Social Development (Protection, Education, Health`)

Head of Delivery Unit
at the Agency for
Strategic Development
and Reforms under
President

**Isomiddin
Akramov**
Programme Analyst on
Climate Change for
UNDP Uzbekistan

About Daniel Riveong

Strategy and Foresight Lead at Plural Futures

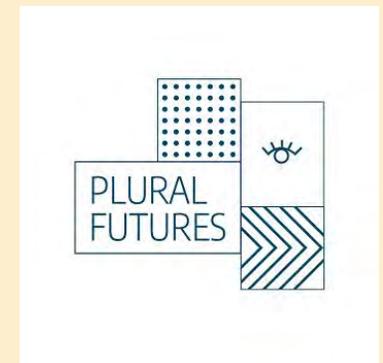

About Daniel

Over 10 years in Strategic Foresight with topical focus on Deep tech, Agri-Food Systems, Governance, Non-Western futures.

Beyond Plural Futures, he is also associated with:

- Foresight Learning Lead for the NGFP Fellowship Programme at the School International Futures (SOIF)
- Board Member, Association of Professional Futurists

Daniel previously spent over +15 years in digital technologies and advertising in San Francisco and Kuala Lumpur

About Plural Futures

Since 2013, Plural Futures has helped organizations translate uncertainty and emerging trends into opportunities and new strategies.

Plural Futures has worked across the public and private sector in Europe, Asia-Pacific and Beyond.

Warm Up Activity

It's 2030. What might the world say about us?

Activity Instructions

WIUT

Individual reflection (10 min)

Think about two newspaper headlines from 2030:

- One positive/aspirational (a success story)
- One negative/critical (a risk or failure)

Activity Instructions

WIUT

Paired discussion (10 min)

Share your headlines and reflect:

- What should **change** to achieve the desired futures?
- What should **change** to avoid the undesired futures?

Closing

WIUT

We'll use the next 4 days to explore how anticipatory innovation governance helps us move toward the headlines we want — and navigate away from less desirable futures.

Setting the Scene: Uzbekistan 2030

Anchoring Our Learning Purpose with Uzbekistan 2030

“Build a free and prosperous, strong New Uzbekistan, create every citizen every opportunity to develop their potential, raise a healthy, educated and spiritually developed generation, form a strong economy that has become an important link in global production, as well as guaranteed justice , the rule of law, security and stability,”

1. Creating suitable conditions for each person to realize their potential
2. Ensuring the well-being of the population through sustainable economic growth
3. Conservation of water resources and environmental protection
4. Ensuring the rule of law, establishing a public administration “at the service of the people
5. Continuing the work of turning the country into a safe an peace loving state

Introduction to Futures Mindset & Leadership concepts

The future is not an empty space but like the past is an active aspect of the present
- Ivana Milojevic

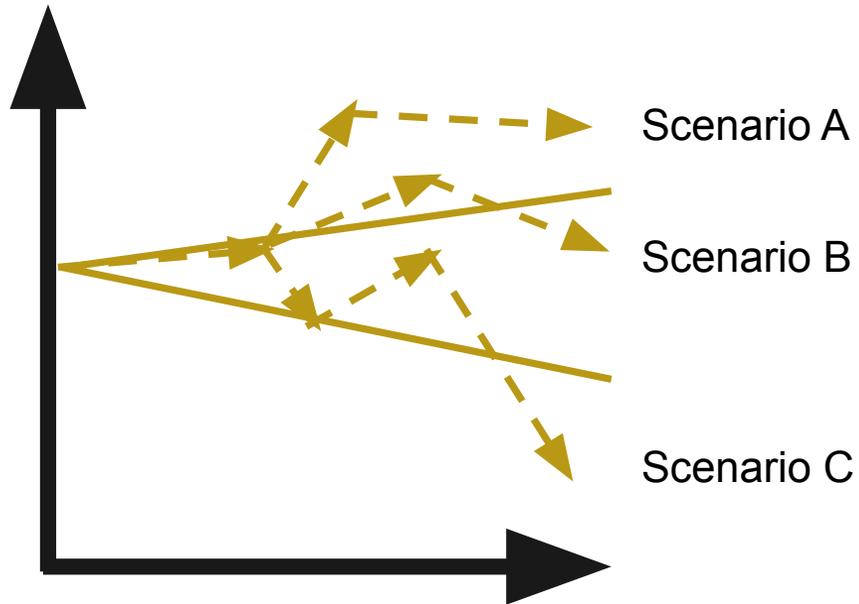

Re-perceiving How We View Change

We're not predicting one future,
but preparing for many.

How can we expand our understand of the options and possibility we have today?

Expand our mind on what's possible

Look beyond high-impact drivers we understand

Look at high impact drivers, we do not fully understand

*You can't control the future,
but you can influence it,
by what you choose to do -
and what you choose not to do.
- Wendy Schultz*

Leadership in Times of Change

Traditional Leadership

- Linear planning
- Efficiency
- Risk avoidance
- Reactive response
- Short-term focus

Futures-focused Leadership

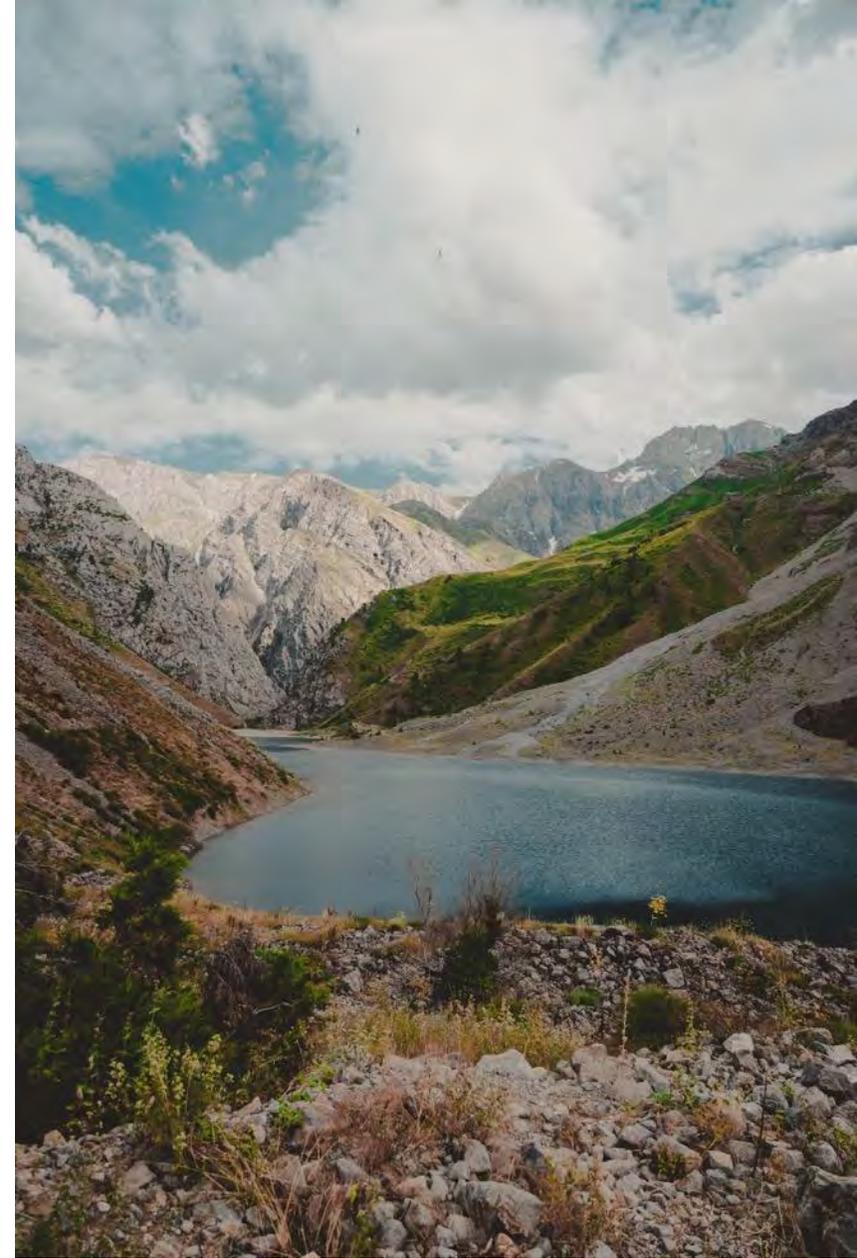

- Systems thinking
- Curiosity, Experimentation
- Opportunity creation, Resilience
- Anticipatory action
- Long-term vision with near-term action

Futures leadership is not about having all the answers, but about creating the capacity to respond to change

Why it matters for Governance?

Water, Demographics, Energy, Transportation:
Each faces **deep uncertainty** → long-term investment choices.

How can we better head towards the visions and goals of Uzbekistan 2030 in areas of high uncertainty?

Futures Mindset & Process

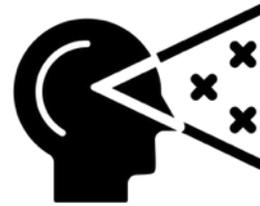

WIUT

Sensemaking

Scanning Constantly for Weak Signals -

Convening Diverse Voices Early

Implications

Creating Safe Spaces for "What If?"

Translating Uncertainty into Options

Impact

Systems Thinking: Introduction

Systems Thinking is part of a larger, separate field – that overlaps with AGI

Systems Theory, Cybernetics, Complexity Science, Transition Design... and more

Systems Thinking – ‘practical’ mindsets and sense-making by folks like Donella Meadows and Dave Snowden

“Systems thinking is a discipline for seeing wholes.

It is a framework for seeing interrelationships rather than things, for seeing ‘patterns of change’ rather than static ‘snapshots.’”

Peter Senge

from the “Fifth Discipline”

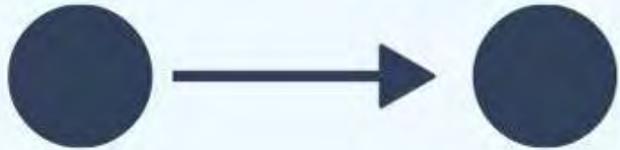

What is a system?

What is a system?

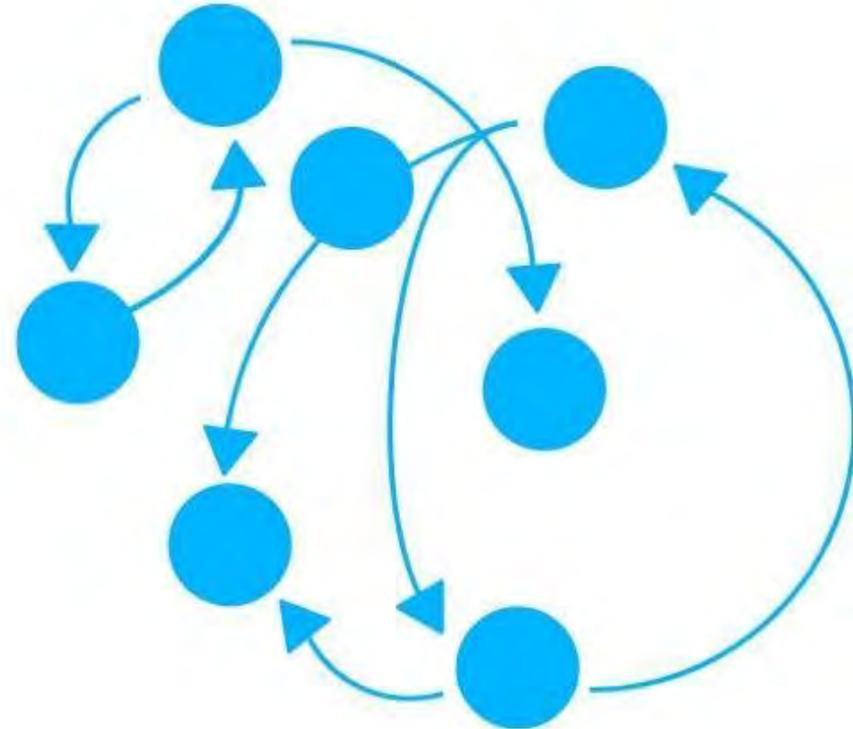

“A system is a **set of things**—people, cells, molecules, or whatever—**interconnected** in such a way that they **produce their own pattern of behavior** over time.”

Donella Meadows

Traditional thinking

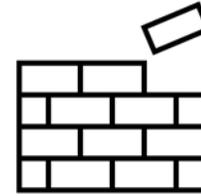

Systems thinking

Complicated or Complex Systems

Throwing a Brick: Complicated

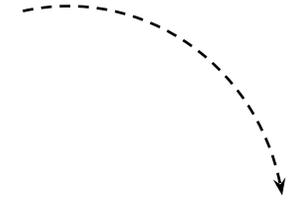

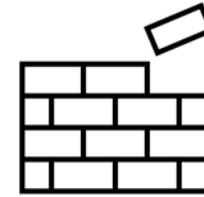

- All components are knowable and definable
- They can be catalogued
- All relationships can be listed
- Cause and effect can be understood and replicated
- It is the sum of its parts

Complicated or Complex Systems

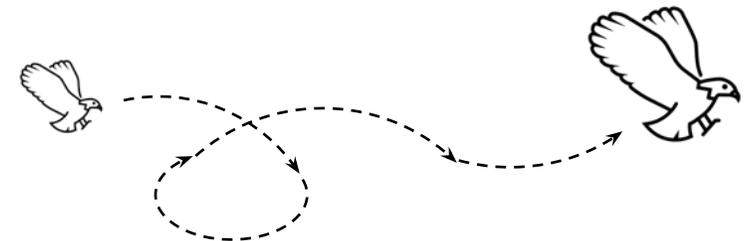

Throwing a Brick: Complicated

- All components are knowable and definable
- They can be catalogued
- All relationships can be listed
- Cause and effect can be understood and replicated
- It is the sum of its parts

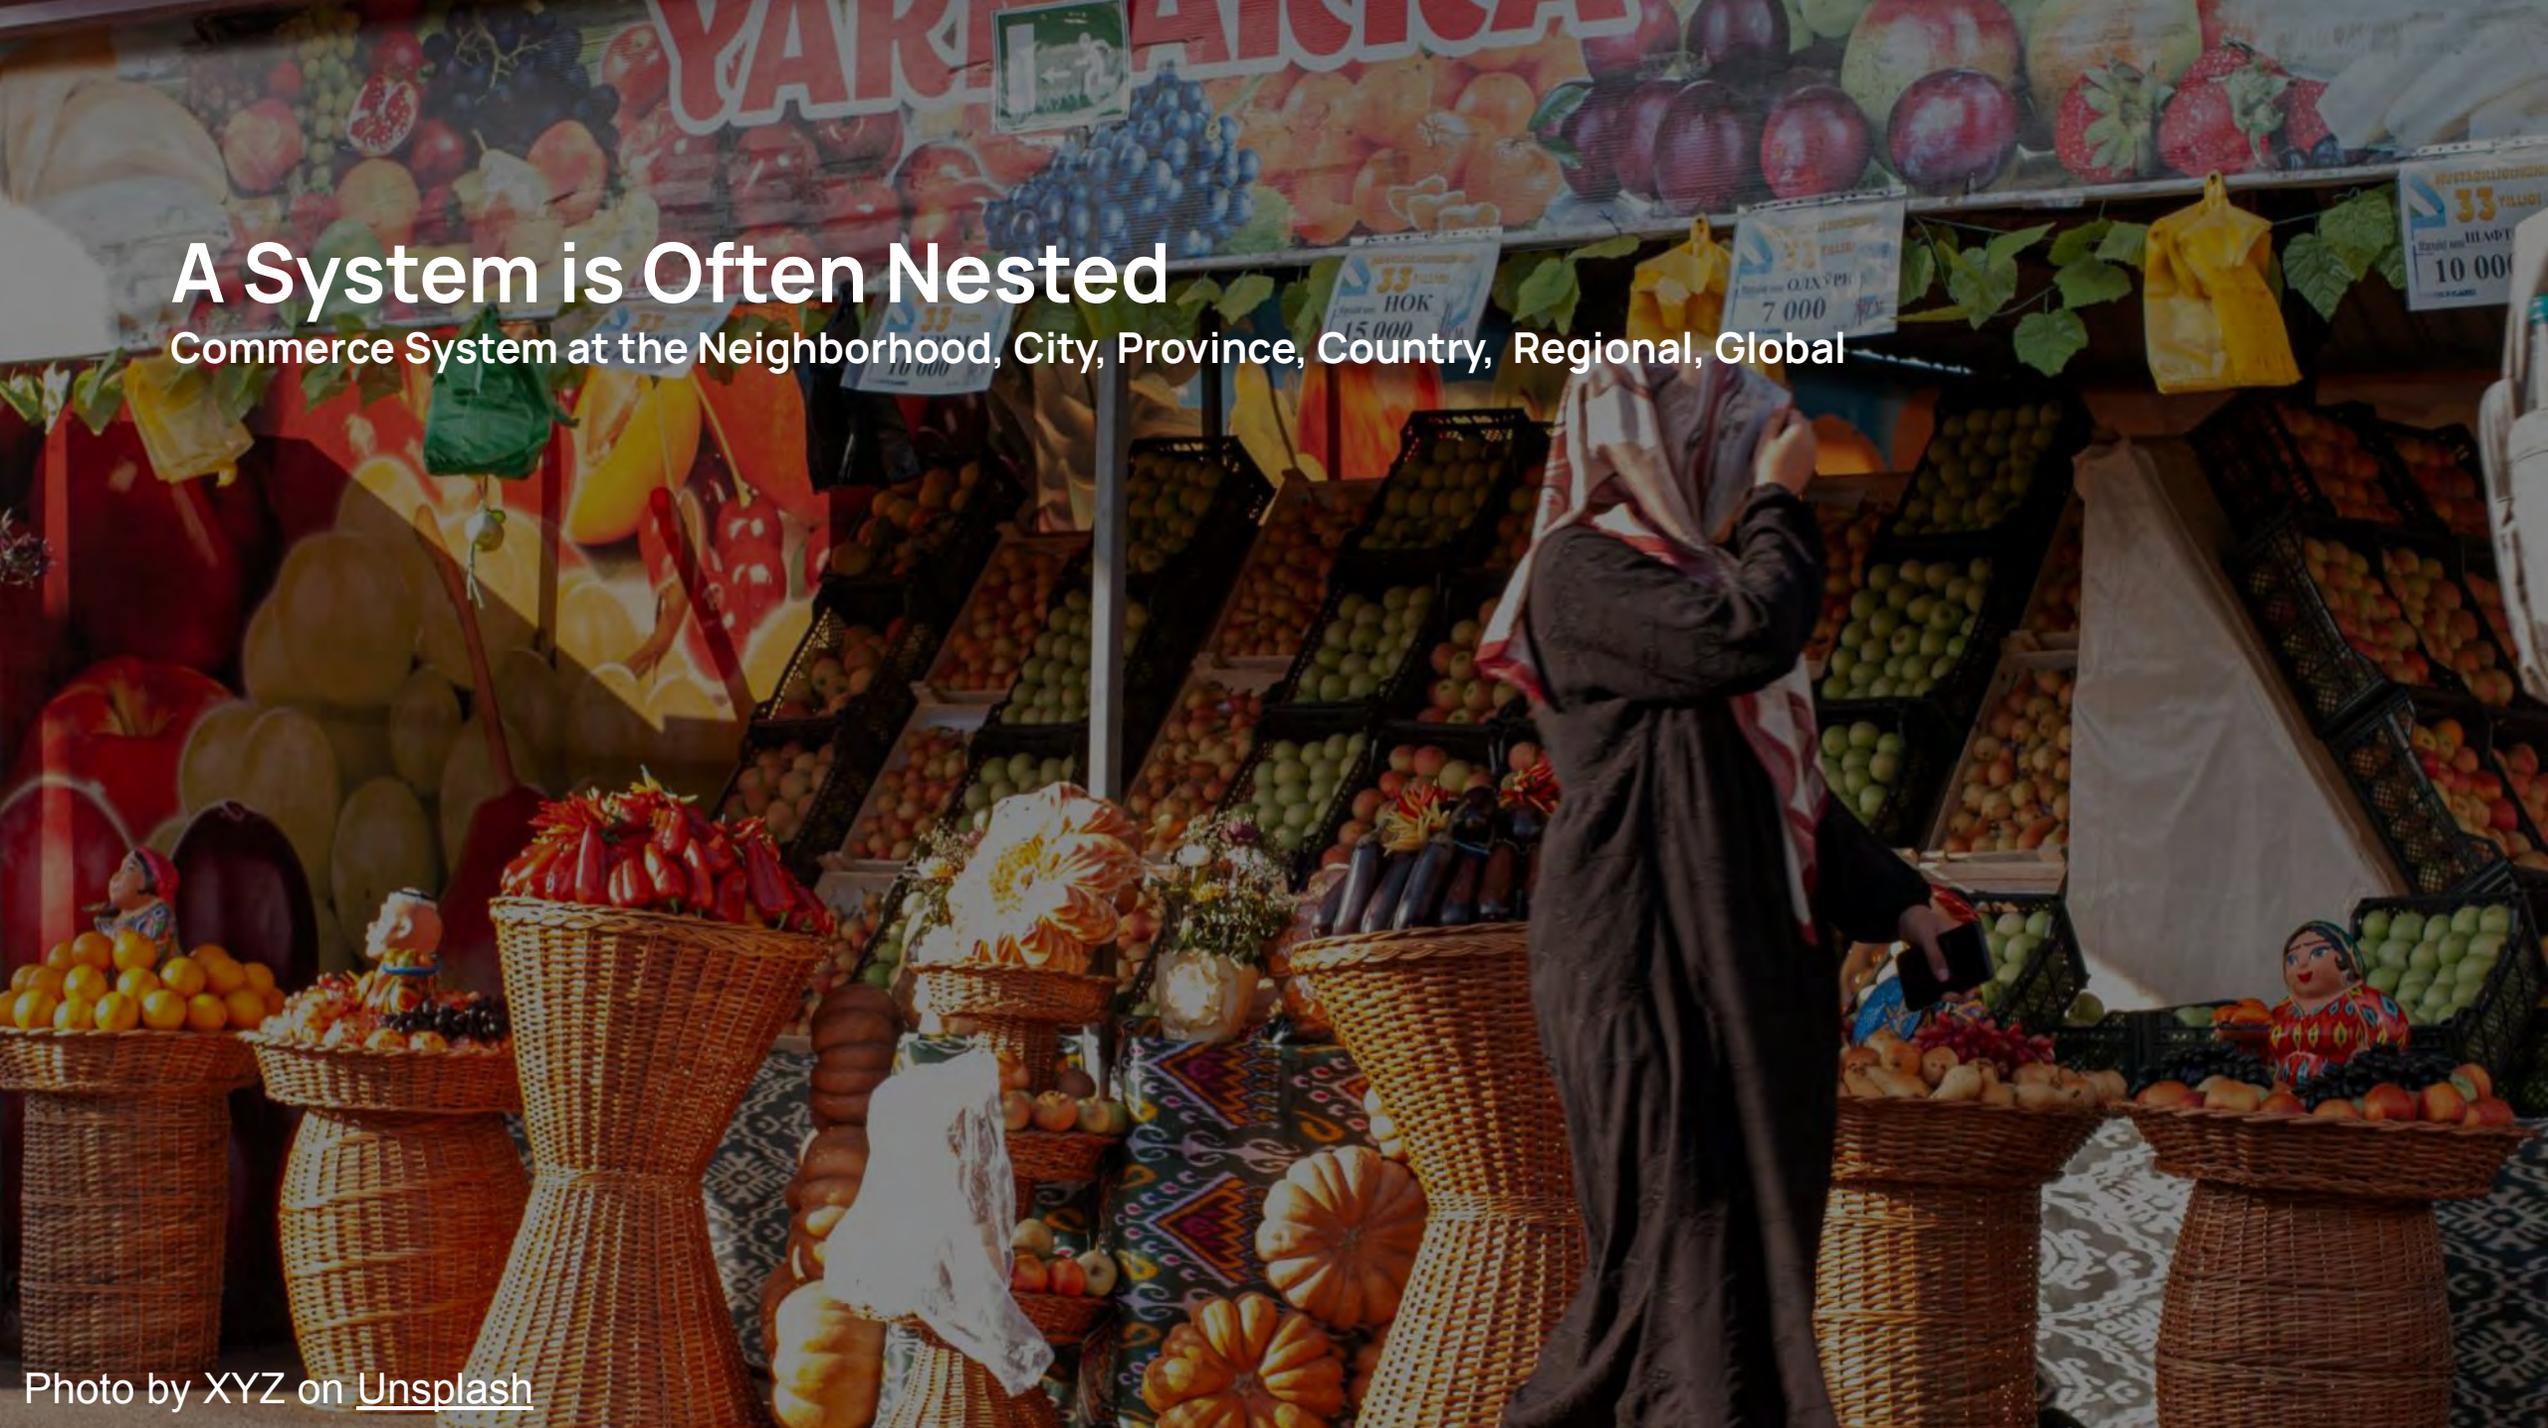

Throwing a Bird: Complex

- Many interacting agents with multiple identities
- Nonlinear: if you alter an agent the effect is not 100% predictable or knowable
- Cause and effect are intertwined
- It is not the exact sum of its parts

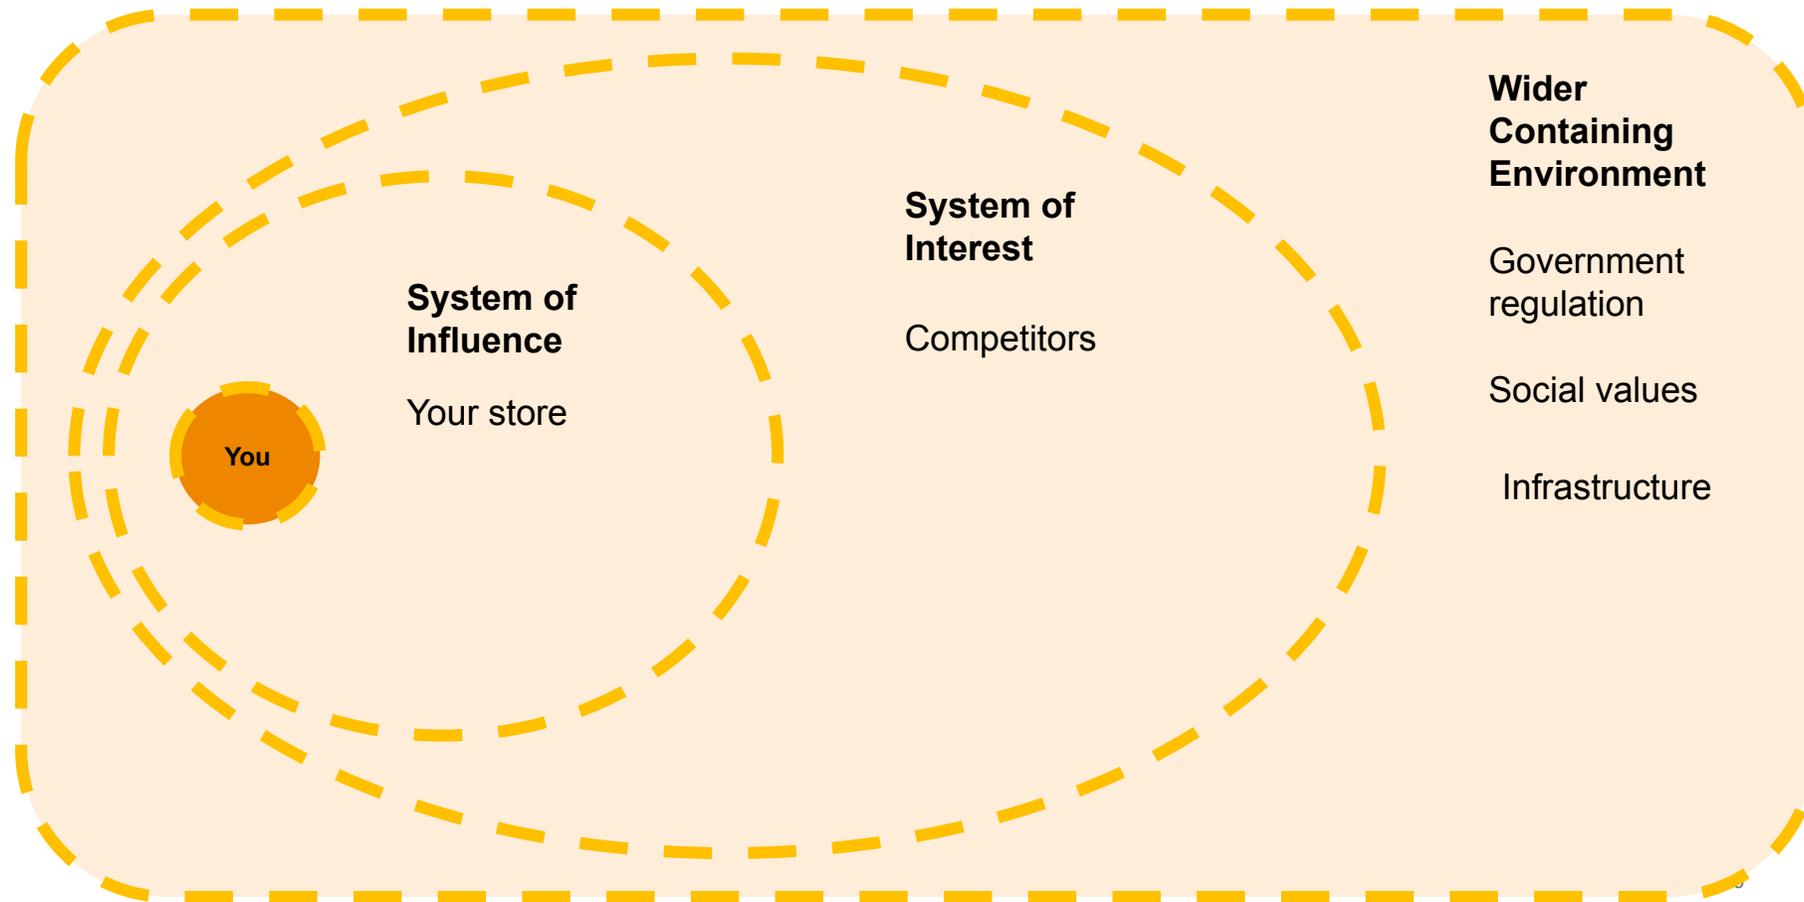

A System is Often Nested

Commerce System at the Neighborhood, City, Province, Country, Regional, Global

Nested Systems & Considering Change

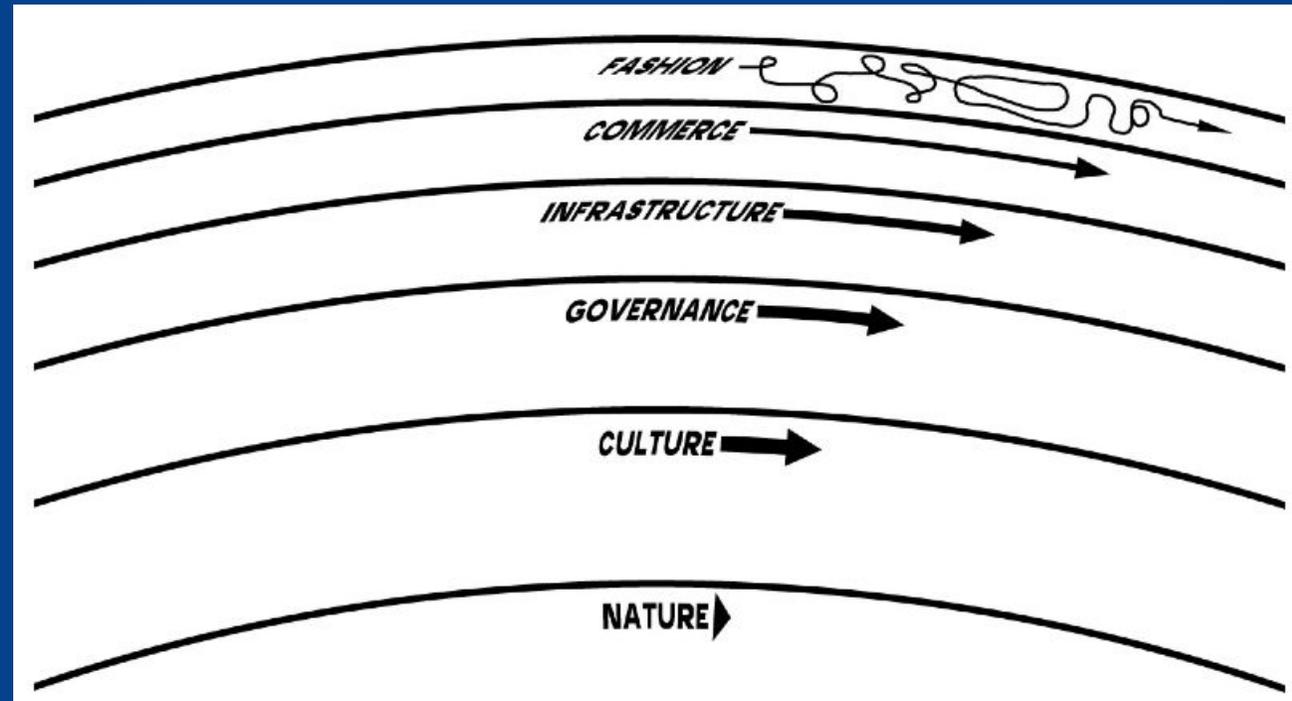

Systems and Different Time Horizons

“Fast learns, slow remembers. Fast proposes, slow disposes. Fast is discontinuous, slow is continuous.

Fast and small instructs slow and big by accrued innovation and by occasional revolution. Slow and big controls small and fast by constraint and constancy.

Fast gets all our attention, slow has all the power.”

Pace Layering: How Complex Systems Learn and Keep Learning. Stewart Brand, 2018 (Journal of Design and Science)

Systems Thinking as a Mindset Shift

Let's start with the first set of slides

Limitations in Traditional Planning Approach

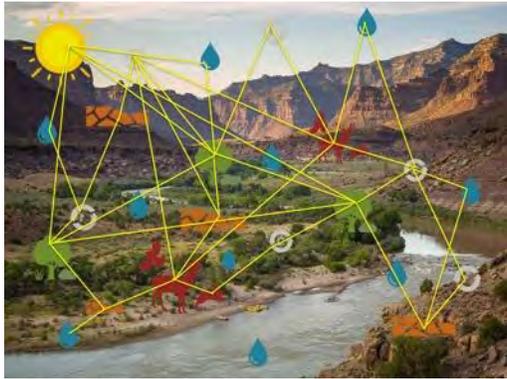

Assumes Completeness of Data

Doesn't Consider Unintended Consequences

Overwhelmed by Non-Linear Change

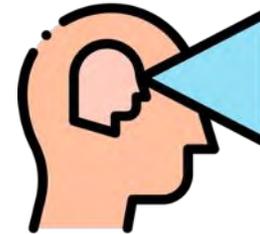

Systems Mindset Considers

WIUT

Ecosystems Approach

- Analyze the Whole, not Sum of its Parts
- Look at relationships, context

Reflexive Thinking

- Question assumptions
- Engage different stakeholder perspectives

Embrace Non-Linearity Change

- Look at change non-linear
- See interconnections as points of leverage

Systems and Drivers of Change

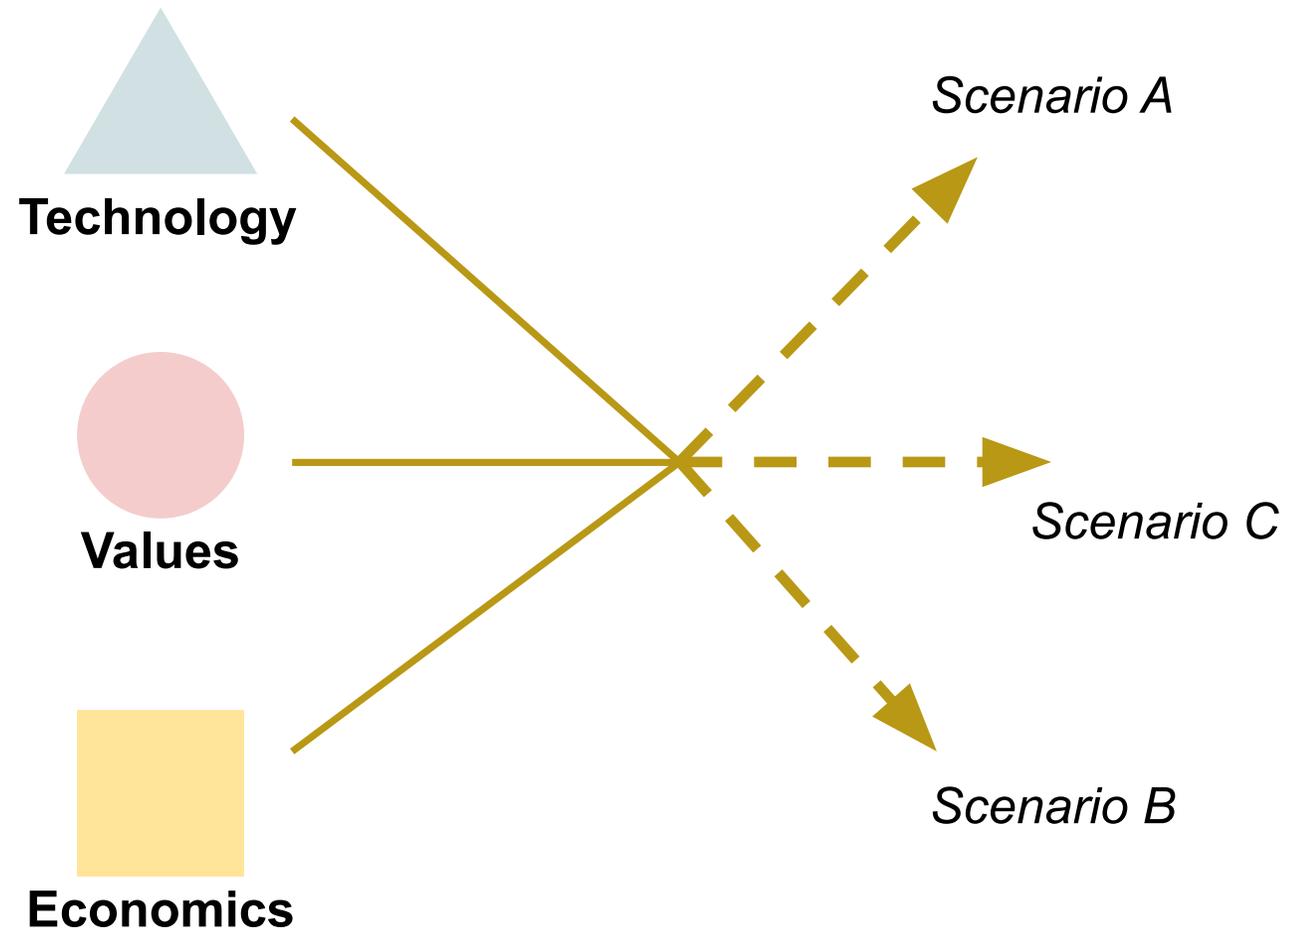

Exploring and Colliding Drivers

What are Drivers of Change

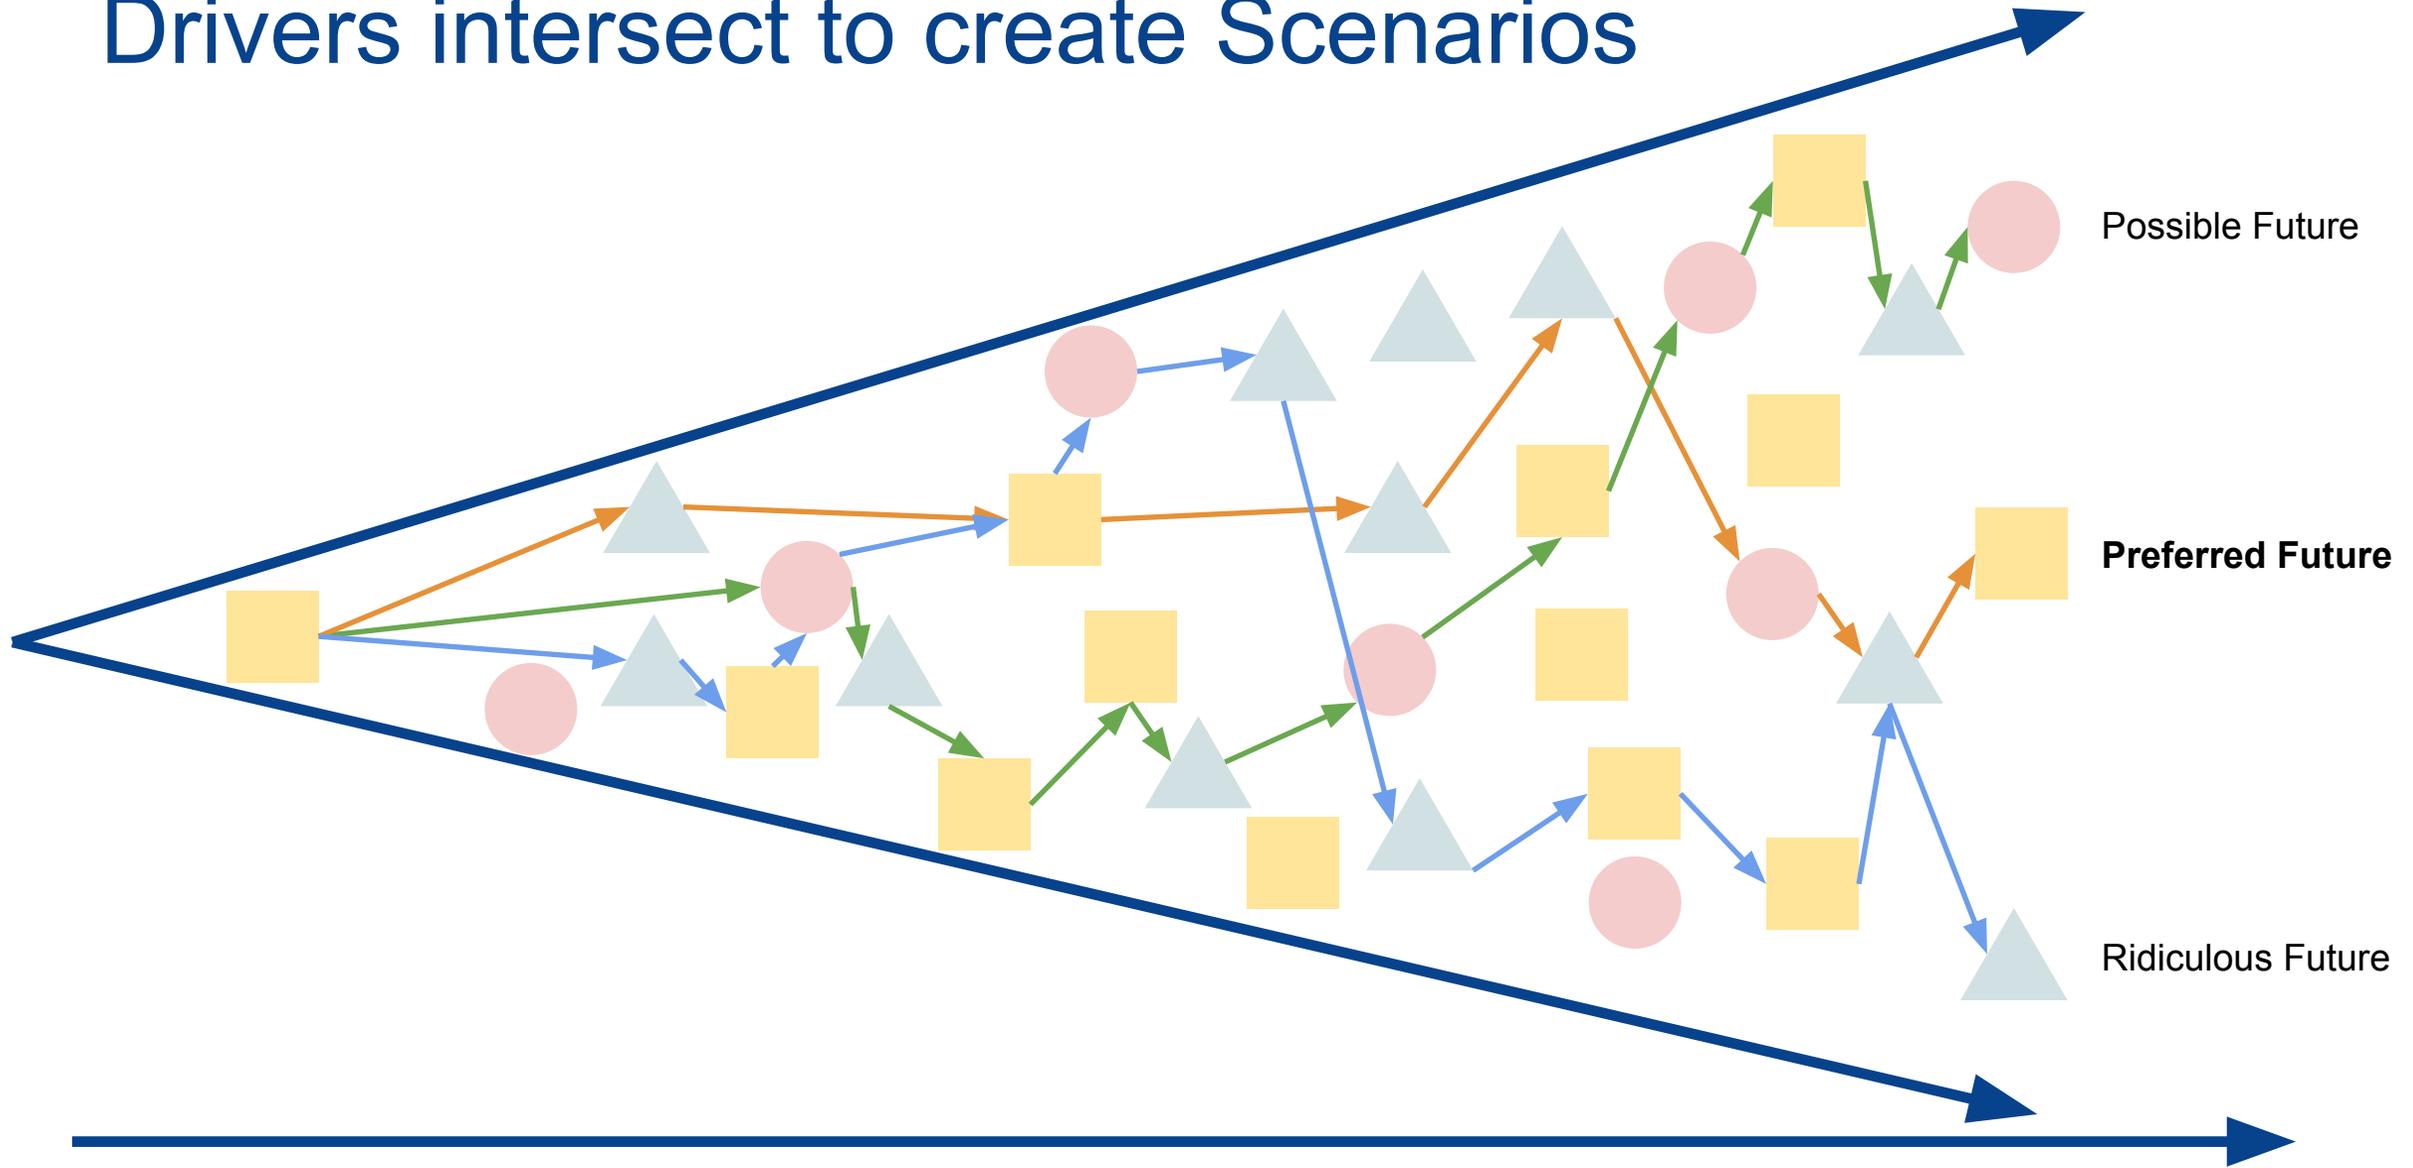

Drivers are major forces that are shaping democracy and governance in our region, and often globally.

Global & Systemic Drivers of Change:

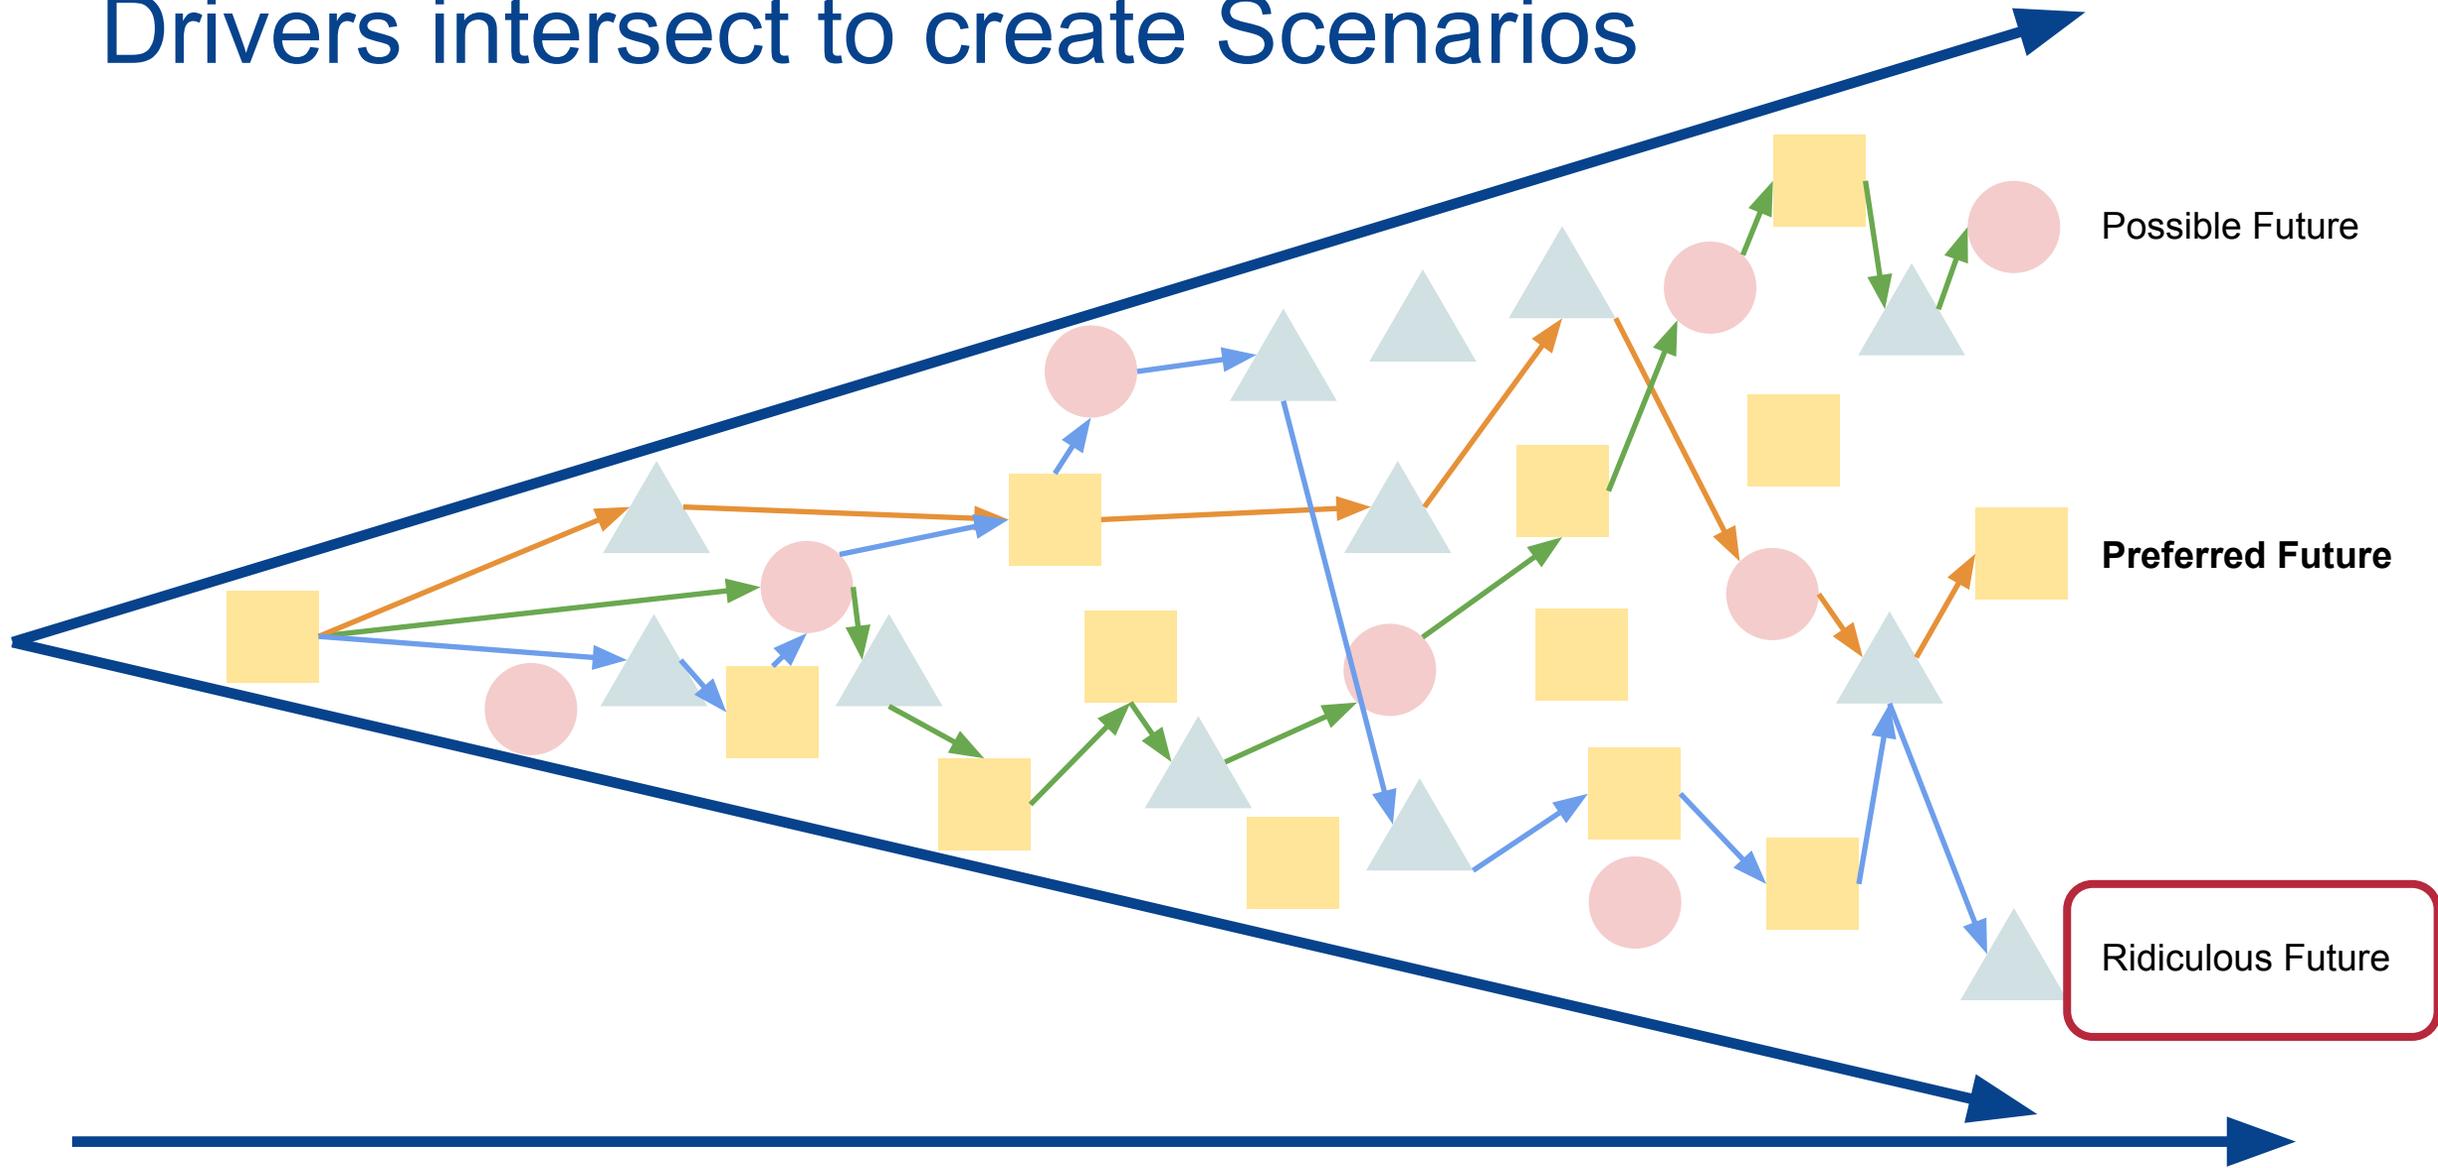

Climate Change, Demographic Change, Digital Media

Drivers intersect to create Scenarios

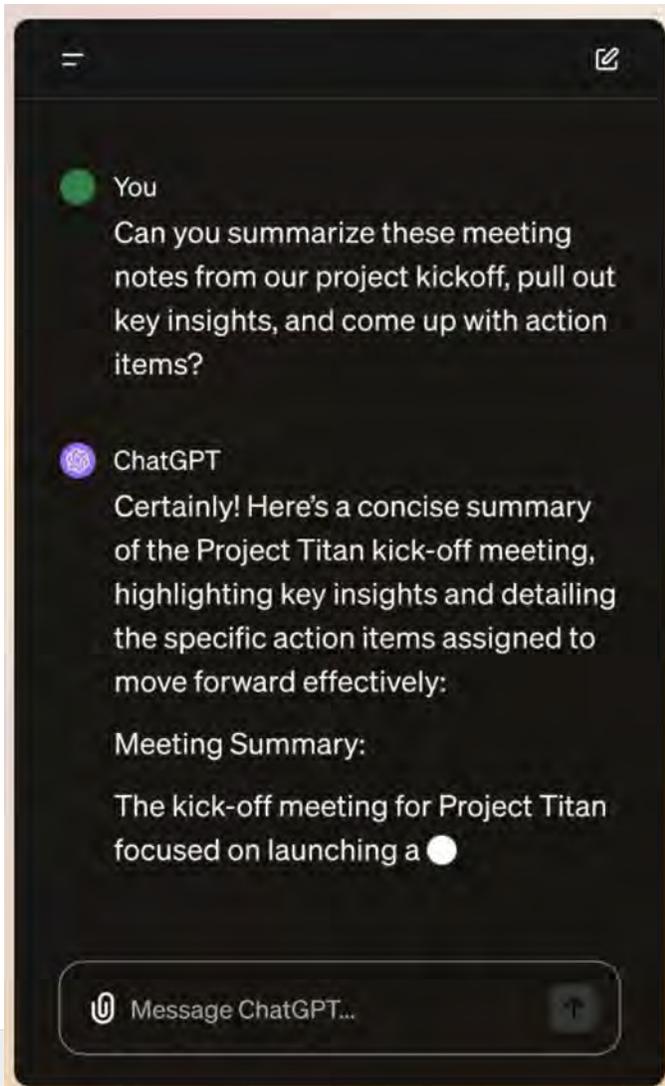

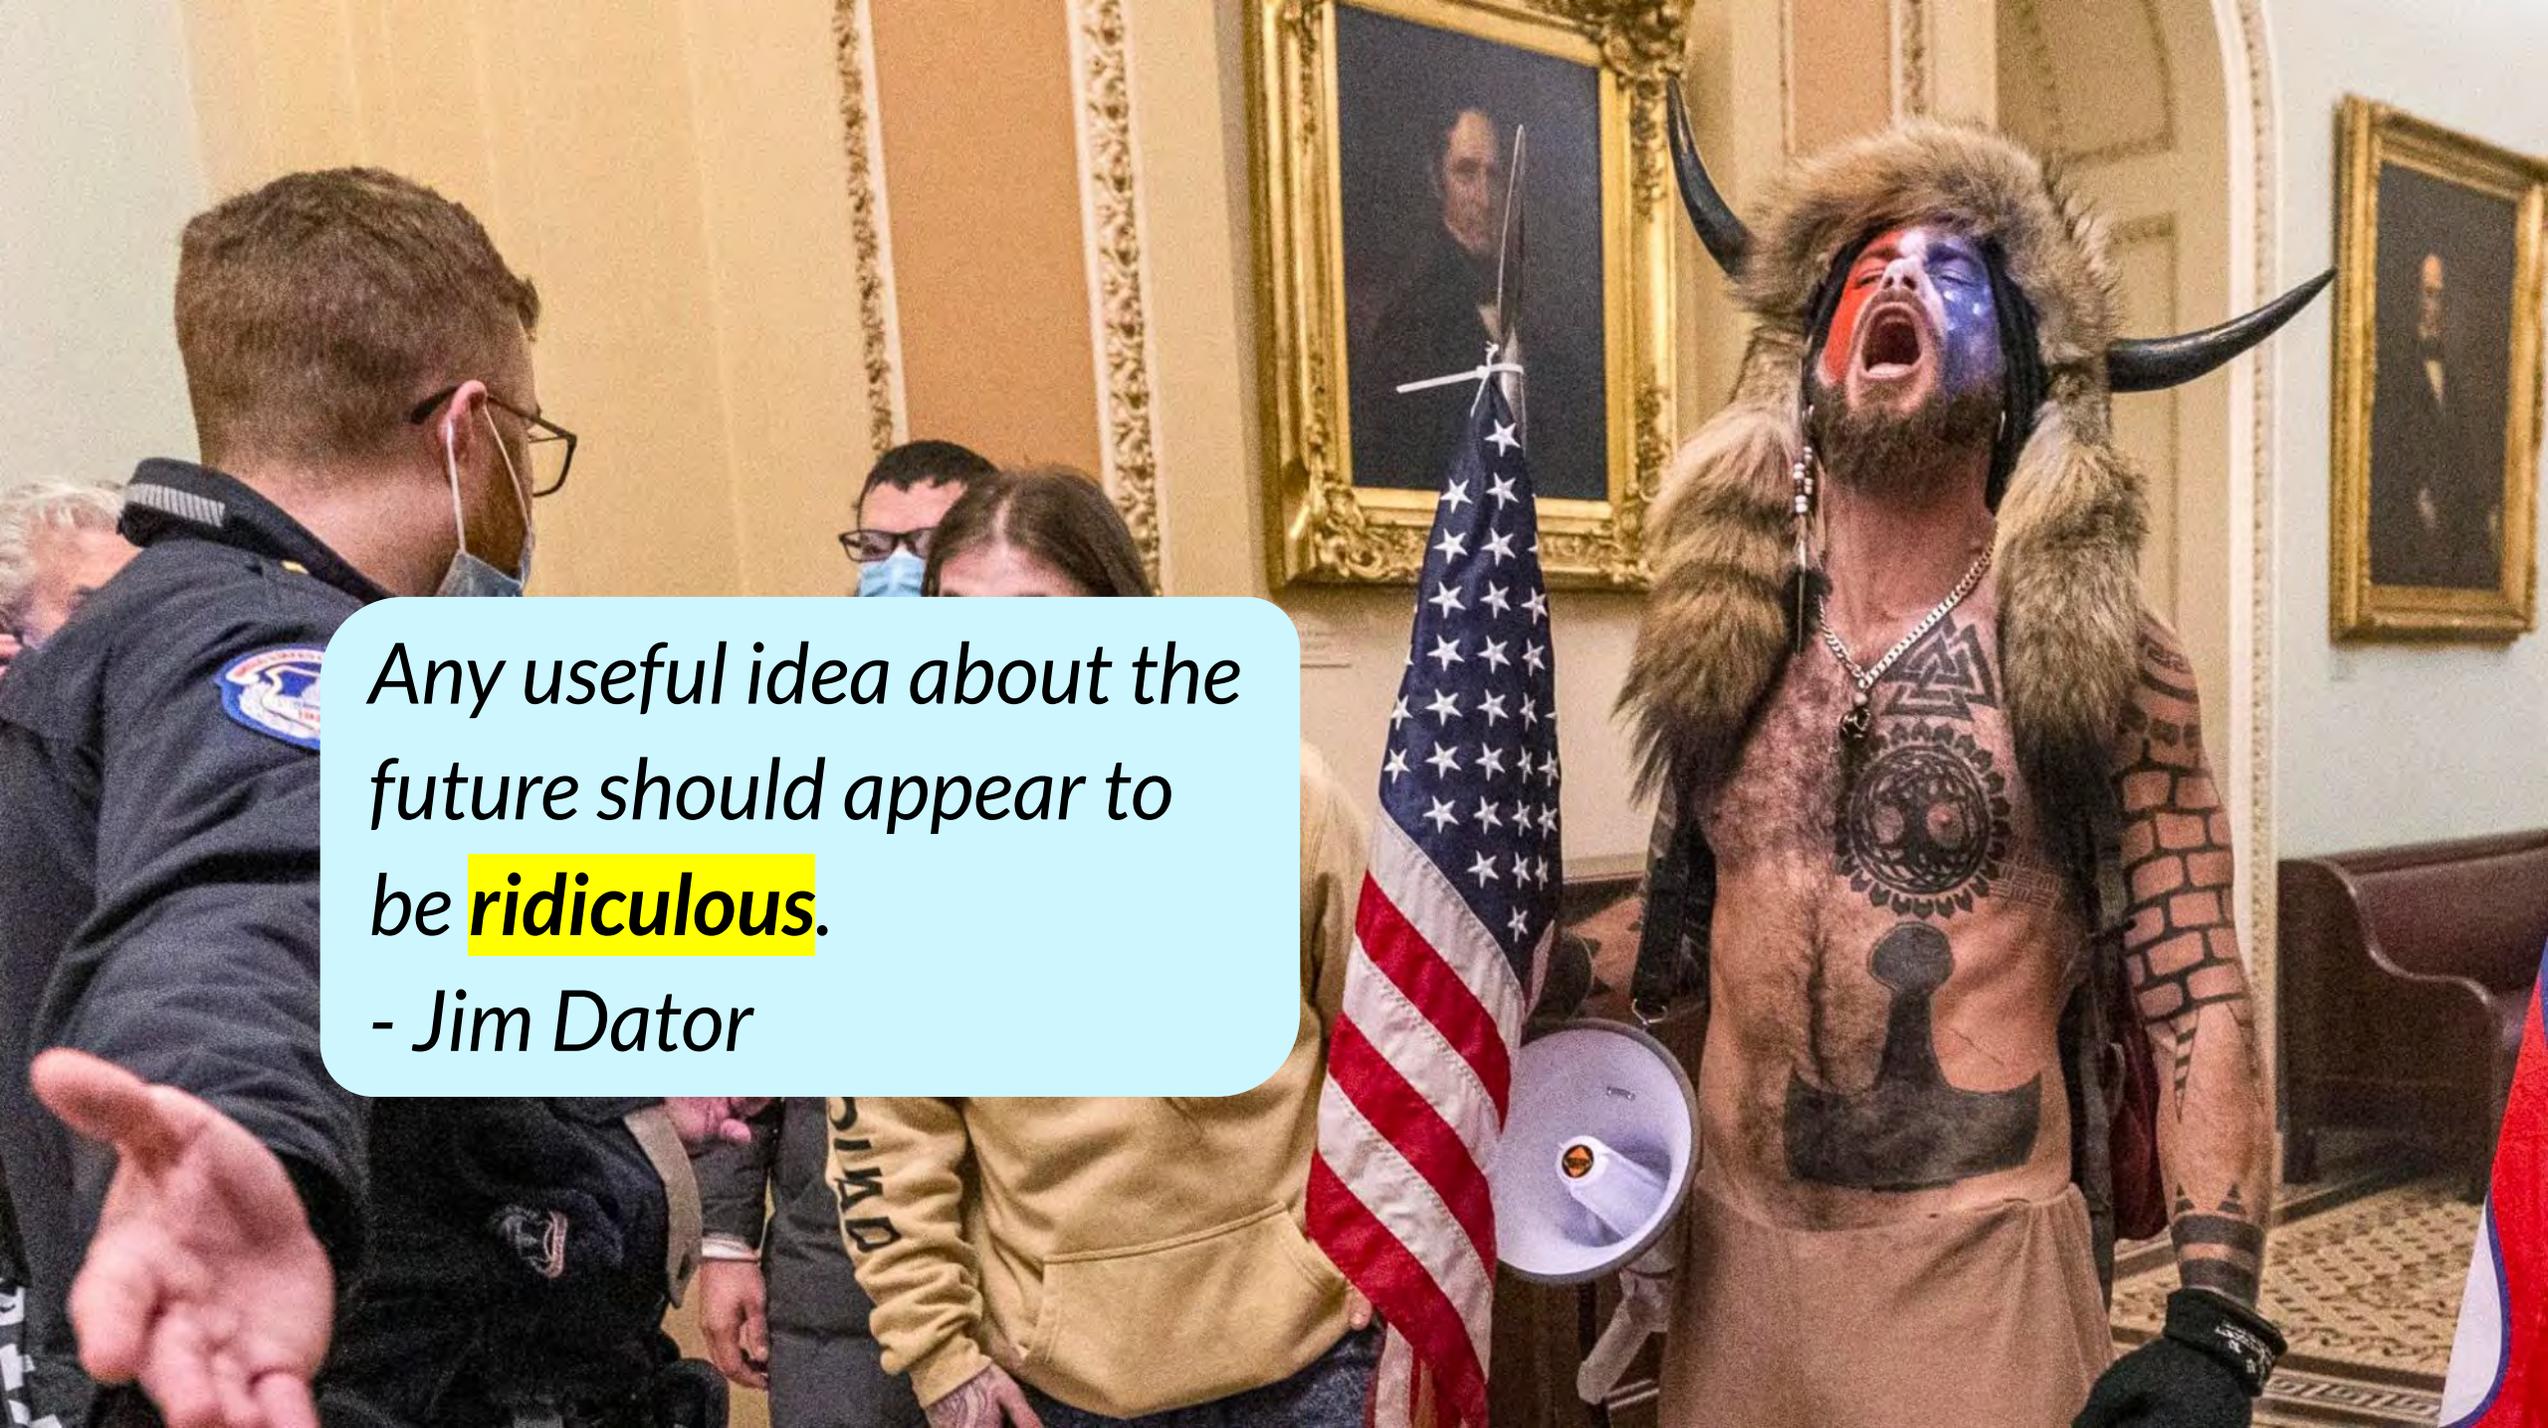

Drivers intersect to create Scenarios

Ridiculous: 'Unexpected' Implications

WIUT

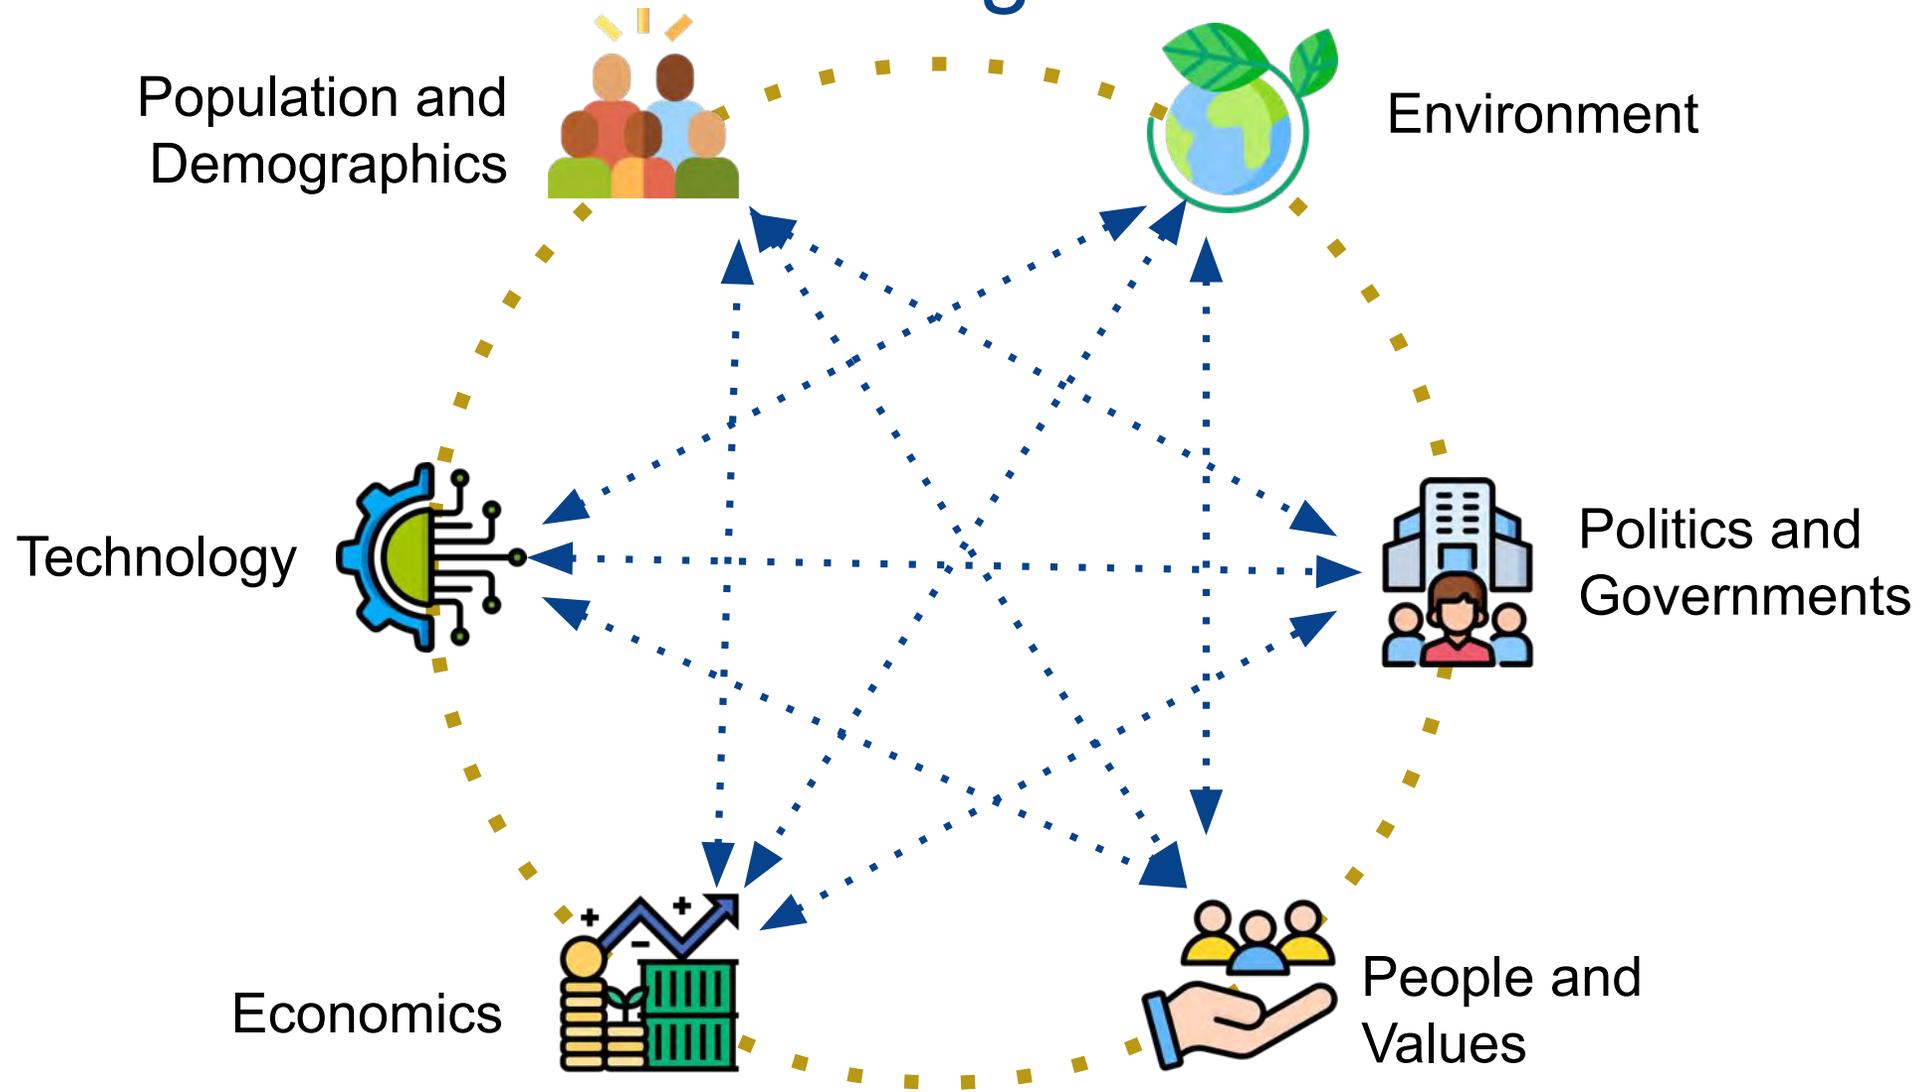

A man dressed as a bison, wearing a large fur hat with horns and having red and blue face paint, is shouting with his mouth wide open. He is holding an American flag and a megaphone. He has several tattoos, including a large circular one on his chest and a brick pattern on his left arm. In the background, there are other people, some wearing masks, and framed portraits on the wall.

Any useful idea about the future should appear to be **ridiculous**.

- Jim Dator

Domains of Drivers of Change

Pair Exercise

Exploring and Colliding Drivers

Spend 2-3 minutes reviewing the cards, pick 2-3 drivers that you find interesting

Pair up with 1 other person each of you pick a driver.

Share with your colleague why you picked this driver

Drill deeper into the “so what?” of each driver.

What does this driver make me worry about?

What does it make me excited about?

Plausible

(Very likely, Now-5 Years)

Possible

(Could happen, 5-20
Years)

Preposterous

(Most people would never
think it would happen,
20-35 Years)

Colliding A+B

Key Elements	Plausible (Very likely, Now-5 years)	Possible (Could happen, 5-20 years)	Preposterous (Most people would never think it would happen, +20 years)
<p>Factor A (your choice) +</p> <div data-bbox="417 476 736 641" style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center; margin-bottom: 20px;"> <p>Big Tech</p> </div> <p>Factor B (your colleague's)</p> <div data-bbox="417 862 736 1026" style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center;"> <p>Regional Dynamics</p> </div> <p>AND</p> <p>Keep in mind the Other key factors</p>	<p>+ Positive</p> <div data-bbox="856 579 1212 976" style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center; margin-top: 100px;"> <p>US bans Tiktok as tech becomes geopolitical</p> </div> <p>-</p>	<p>+ Positive</p> <div data-bbox="1258 586 1661 1210" style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center; margin-top: 100px;"> <p>Each region develops their own tech champions, bans outsiders</p> </div> <p>-</p>	<p>+ Positive</p> <div data-bbox="1709 358 2109 1369" style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center; margin-top: 100px;"> <p>Each region specialized:</p> <p>South Asia focuses on "pharma" and biotech</p> <p>Shuns other technologies as not "South Asian" in values</p> </div>

Drivers of Change

You've just tested the drivers...

What would you change?

What would you remove?

WESTMINSTER

International University in Tashkent

the University of Westminster (UK)

ACTIVITY

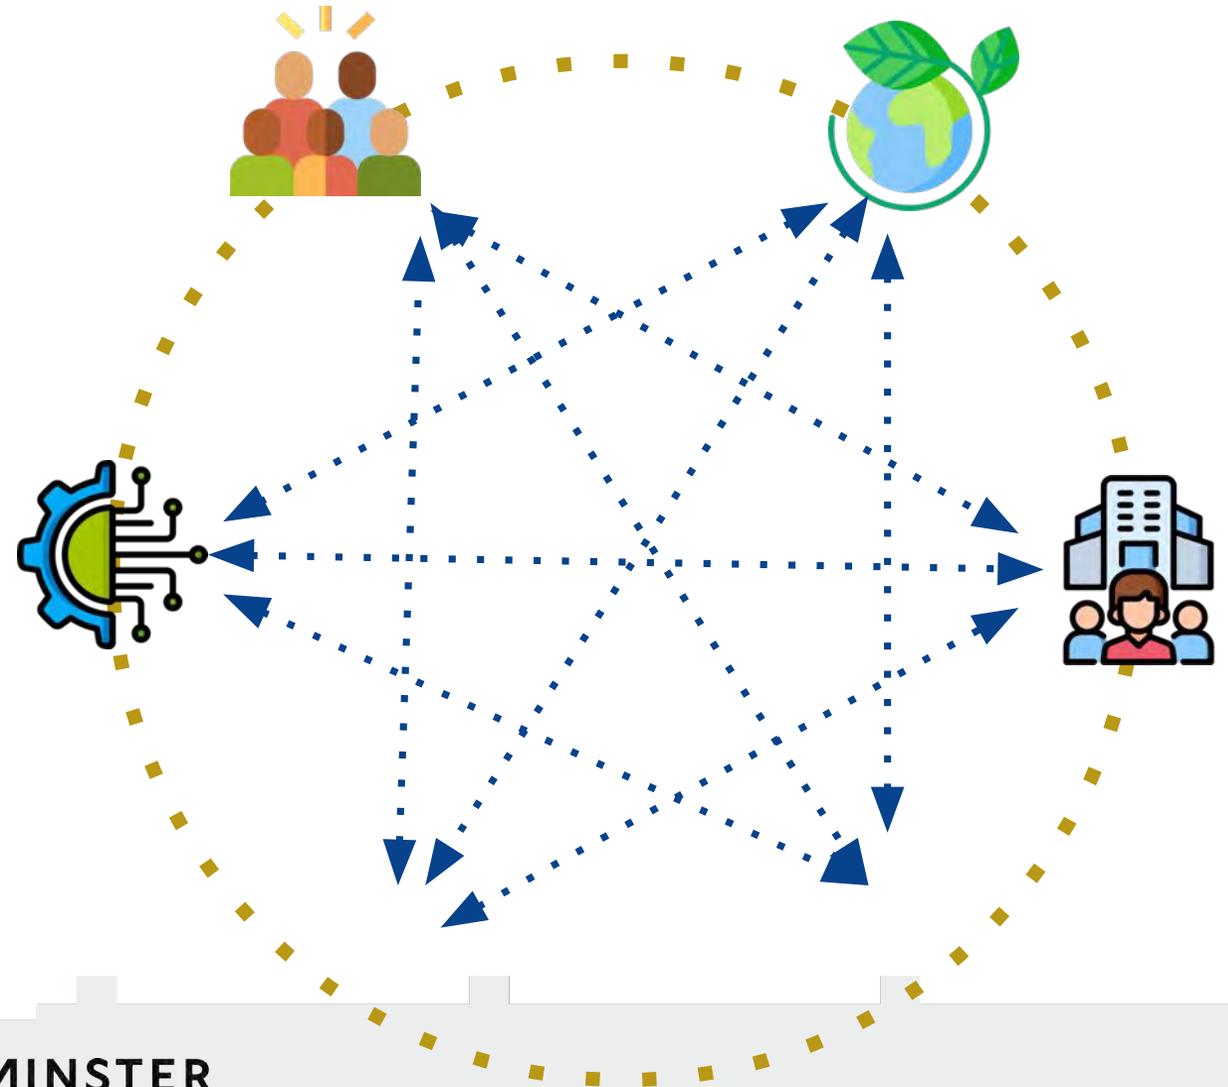

Assessing the Drivers of Change

Drivers of Change

You've just tested the drivers...

What would you change?

What would you remove?

Assessing Drivers Exercise

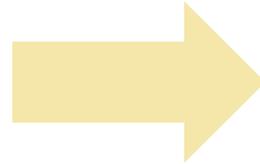

Individually, take a moment to reflect:

- **Which 2 drivers stand out as surprising or important to you?**
- **Any would you change?**
Write it down, up to 2 drivers
- **Would you add a driver?**
Write it down, up to 2 drivers

Assessing Drivers Exercise

Individually, take a moment to reflect:

- **Which 2 drivers stand out as surprising or important to you?**
- **Any would you change?**
Write it down, up to 2 drivers
- **Would you add a driver?**
Write it down, up to 2 drivers

Now share with your colleague next to you

What does your driver look like in your community/context?

What differences do you have? And why?
